'82. The work on the New York Episcopal Cathedral is being rapidly pushed forward by the architects, Heins & La Farge (Geo. L. Heins, Course IV., '82).

'93. C. W. Taintor, Course VI., who, since his graduation, has been in the employment of the New England Telephone Company, and later in that of the West End Street Railway Company of Boston, has lately started upon a trip around the world. Mr. Taintor intends to travel for a year or more.

Among the many men who have studied at Technology without directing their efforts along one of our prescribed courses was David Leonard Barnes. The eminent success of his life merits the attention of our alumni and undergraduates. A Rhode Island man, born in Smithfield, in 1858, he studied at Brown University for two years, from '76 to '78, then came to Technology for one year. This comprised his education for the engineering profession which he took up. Considerable of his time was spent with the Hinckley, and also the Rhode Island Locomotive Works, in which places he extended many courtesies to our students in Mechanical Engineering. His greatest success was as a Consulting Engineer, and in this capacity he was connected with many of the most important engineering undertakings of the day, among which were the Alley Elevated Railway, of Chicago, and the London Central Subway Railway. Besides his connection with the Railway Review he was Mechanical Editor of the Railroad Gazette up to the time of his death. He was a member of no less than eight engineering societies, before all of which he has presented noted papers. He wrote two books on Locomotives.

I. K. Baxter, of Trinity College, jumped 5 feet 11½ inches in the recent Trinity games. This is 2 inches better than the New England Intercollegiate record.

The 1900 Baseball team has secured the use of Irvington Oval on Monday, Wednesday, and Friday afternoons. Ninety-nine practices there on other afternoons.

Course I., '98, has organized a baseball team which will soon be in a position to meet the teams organized in several of the other courses. Mr. Delano was elected captain.

The '99 Track team have appeared in very neat running suits, consisting of blue pants with gold strip and a white shirt crossed by a blue ribbon, bearing the Class numeral in gold. The following men are on the team: Lathrop, Dryer, Burch, Morse, H. Sawyer, Ferguson, Kimball, Copp, and West.

Battle Ball.

The game entitled "battle ball," recently introduced in our Gymnasium by Mr. Boos, became popular so rapidly that Mr. Boos was able to pick an excellent team, and made bold to challenge Harvard's long-established team. The challenge was accepted, and the teams met last Saturday afternoon in the English High School Drill Hall. After playing two halves of ten and five minutes, the contest was decided by a score of 76 points for M. I. T., to Harvard's 50 points. The Technology team was particularly strong in hard throwing and quick team work. It was made up as follows: G. I. Copp, '99, right guard; M. F. Delano, '98, center guard; H. M. McMaster, '99, right thrower; D. Mayer, '98, left thrower.
