SURFACE GRINDING MACHINES.
Patented August 12, 1890.

These machines are used for grinding parts of machines of cast iron or steel, either hard or soft. The entire cost of files is saved, and better surfaces are obtained at one quarter the cost of labor usually expended in filing or stoning. Skilled workmen are not required to operate the machine.

Grinds work 60 feet long, 14 feet wide, and 11½ feet high.
