already been sent to the members of the Faculty, the instructors, alumni, etc., and it is intended to canvass for subscriptions among the undergraduates. The subscription price is $1.00 per year; single numbers, thirty-five cents. Remittances should be made to the Technology Review, 71 Newbury Street, Boston. The Review will be on sale at Macleachlan’s, and in Rogers corridor by the business management of The Tech.

The frontispiece to the first number is a very fine reproduction of a portrait of President Crafts, and is itself well worth the price of the magazine. The following Table of Contents indicates the scope of The Review for January, 1899:

**President Crafts.** Frontispiece Announcement.
The Function of the Laboratory. Silas W. Holman
President Crafts.
The Pierce Building. E. B. Homer
Reprints, in Fac-simile, of Early Institute Documents and Letters.
A Page by Gelett Burgess.

**Departments:**
The Institute.
M. I. T. Publications.
The Technology Club.
Assocations:
The Alumni Association.
Local Associations.
Association of Class Secretaries.
General Notes.
Class Reports.
Necrology.

The Senior Dinner.

Just ninety-nine members of the Senior Class assembled at the Hotel Vendome last Friday evening to celebrate their last undergraduate dinner. As it was only fair to expect, the occasion was in every way a fitting conclusion to a remarkably successful series of Class dinners, each of which has proved a little more enjoyable than the previous one. In the present case the accommodations were excellent, the dinner fair, and each man bent on having the most enjoyable time possible. A pleasing innovation was an orchestra which rendered numerous selections throughout the course of the dinner. The menu cards bore a tasteful design by H. S. Graves, and for each course of the dinner, as well as each toast on the list, there was a suitable quotation. These, as a rule, were singularly appropriate, and seemed to have been chosen with unusual care. There were but five speeches upon the programme, these being interspersed with numerous vocal and instrumental musical selections.

Mr. Stebbins officiated ably as toastmaster, and drew largely from his usual fund of interesting stories. The postprandial exercises began with an address by the President, Mr. Hamilton. Following this were selections by the ’99 Quartette—Messrs. Adams, Johnson, Pierce, and Paige. Mr. Renshaw then spoke on “Class Day,” describing the programme, and telling of the magnitude and importance of the event. Messrs. Loomis and Paige next entertained the company with flute and piano, after which Mr. K. M. Blake quoted some “Reminiscences” regarding men and events prominent in the history of the Class. Several solos by Mr. Johnson received their usual tremendous applause, and when he had declined all further encores, Messrs. Addicks, Hazeltine, White, and F. M. Blake rendered several banjo and guitar selections. Mr. Hammond spoke ably and impressively on “Technology” and the duty of the members toward their Alma Mater. Messrs. Loring and Gillson then presented selections from various comic operas on violin and piano. Mr. Newell, under “Theses,” suggested a number of subjects for men in the different courses, and the list was then closed by more selections by the ’99 Quartette.

It was moved that the toastmaster express to Messrs. Burch and Robinson, who were both unable to be present through sickness, the regret of the Class at their absence and hopes for their speedy recovery. Various songs and stories were then sung and told, and soon, with cheers for Technology and the Class, the members separated.
