nancy to see him close up the distance and win out. But they reckoned without their host. Garrett's beautiful stride enabled him to hold his advantage easily. On the second lap Long seemed to realize that he was no nearer his man, and he let out a couple of links. So did Garrett. The pace was terrific; and, as they started on their last lap, it was apparent that Long had shot his bolt, and to the surprise of the spectators Garrett began to increase his lead, and Technology was again a winner by 30 yards. The time made was 3 minutes, 14.3 seconds, which is a full second faster than has been made for several years. This shows that Tech. has one of the fastest, if not the fastest, relay team in the country.

Garrett's work was nothing short of phenomenal. Unofficial time gives him 46.3 seconds for his first relay, and 47.3 seconds for his second relay, when he represented the First Heavy A. A. against the Knickerbocker Athletic Club. The time for his first relay has not been approached on the Mechanics Hall track this season, at least, and probably not for many years.

Mrs. Rogers' Reception.

Mrs. William Barton Rogers entertained the young women students of the Institute at her home on the afternoon of March 4th, which was her birthday. A delightful musical programme was enjoyed. There were some exquisite songs by Miss Thompson and Miss Porter. A few of the favorites were, “Loch Lomond,” “The Rosary,” and Ethelbert Nevin’s “A Lesson of Life.” There were violin solos by Miss Leach, and selections from Chopin and Shumann by Miss Eyre. Miss Eyre rendered also a quaint French composition called, “The Music Box.” After the music refreshments were served, and the students had the pleasure of meeting Mrs. Rogers’s other guests, among whom was Mrs. W. T. Sedgwick, and of wishing their hostess many happy returns of the day.

Those who ordered 1900 Class pictures may obtain them at the “Cage.” Tickets for the Class dinner to-morrow night, at the Brunswick, are now on sale by the Dinner Committee.

After a stormy debate, the minority nominations of the Executive Committee of the Sophomore Class were put to vote, resulting in the election of N. L. Danforth as President, and H. P. Parrock as first Vice President. The Class dinner will be held to-night at 7.30, at the Vendome.

We are sorry to announce the resignation of Mr. E. B. Cooke from the Business Management, and of Mr. B. W. B. Greene from the Board of Editors of The Tech. Mr. Cooke has, at the advice of his physician, left the Institute to spend the rest of the term in the South. Mr. Greene is now at St. Margaret’s Hospital. Both will return to the Institute next fall. Mr. T. W. Brigham succeeds Mr. Cooke as Business Manager.

At the meeting of the Society of Arts at the Institute to-night, Mr. Theodore H. Skinner, S. B., ’92, Superintendent of Construction at the University of Virginia for McKim, Mead and White, will present a paper on “The Construction of the University of Virginia, Old and New.” Views of the original plans made by Thomas Jefferson, with the buildings as formerly constructed and now rebuilt and extended, will be shown on the curtain, and a full description given of the unusual structural problems involved. All persons interested are invited to be present.
