low hurdles. He won his heat as did Kendall of Amherst, Potter of Williams; and these three with Carpenter of Dartmouth, who won the heat for second men, started in the finals. This was a fast field but Burch was in beautiful form. Clearing the flights splendidly, he covered the distance in $25\frac{3}{8}$ seconds, an easy winner. This is the Intercollegiate record for the event.

On the way home that night he was unanimously elected captain of the Track team for this year, which position he resigned last winter.

In the Fall Meet at Holmes' Field he showed that he had lost none of his speed, by coming in a close second in the 100-yard dash which was won by Hall, '00, from the 3-yard mark in $10\frac{3}{8}$ seconds. He also won the 220-yard hurdles in $26\frac{3}{8}$ seconds.

Shortly after these games he was taken ill with appendicitis and has done no Track work since. It was his intention to start in on the Charlesbank Track last Tuesday for the spring training.

We print the following from Professor Swain:

"For the first time in many years, if not for the first time in the history of the Institute, the ranks of the Senior Class in Civil Engineering have been broken by the death of one of its members. Guy P. Burch entered the Institute in September, '95, and until the present year was a regular student in Course I. In the autumn of '89 he was an attack of appendicitis kept him away from school for a number of weeks, and upon his return he was obliged to relinquish the hope of graduating with his class, and wisely determined to devote an additional year to his work and to graduate with the Class of '00. He was apparently rapidly recovering his strength and successfully continuing his studies when sickness again laid hold of him, and he was taken away.

"Mr. Burch was an excellent student. He was careful, conscientious, courageous. He had high ideals, and strove earnestly to reach them. He was above all meanness, and his influence among his fellow students was always for the highest and best. Quiet and undemonstrative, and perhaps a little difficult to get acquainted with, he was nevertheless very popular with his classmates, and had the entire respect and confidence of his instructors,—all of whom feel most keenly the loss which they have sustained. He has been cut off just as his prospects were brightest, his hopes highest. We are glad that we have known him, glad that he has been one of us, and with respect and affection tender our tribute to his memory.

G. F. S."
