This is a Co-partnership Firm which has been renewed from time to time, since 1828. It is one of the largest Co-partnerships in the United States, and the largest in either of the above branches of business. Its Manufactured Goods have always been of the first grade, and no inducement has ever influenced it to lower its standard. Its aim has been to reach the most honorable position in mercantile life and, possessing abundant capital, it has always enjoyed the confidence of its friends in America and Europe, as attested by nearly seventy-two years of successful business life. From the beginning the policy of the firm has been to give full value for value received. Respectfully submitted to the thoughtful attention of graduates of the Institute of Technology.

BOSTON STORE: 143 MILK STREET.
