Communications.
The Editors do not hold themselves responsible for opinions expressed by Correspondents.

To the Editors of The Tech:
Will you kindly publish when convenient, the points required, for a man to win his numerals, his A. T. A., and his T.

Yours truly,
'03.

To the above communication we reply—that according to a vote of the Advisory Council on Athletics the wearing of a "T" is restricted to those winning one or more points in a purely intercollegiate competition; members of a victorious relay team adjudged worthy by the Advisory Council.

To wear T. A. A.—Winners of one first or two second places in class or open meets.

In football those having participated in at least two-thirds of the season's games. Managers to be permitted a "T" enclosed by a circle. Exceptions or additions to the above may be granted at the discretion and vote of the Council.

In regard to wearing class numerals we must refer "'03" to action upon the same by class constitution or whatever provision has been made in regard to same.

Entries for the class games, to be held tomorrow evening at the gymnasium, should be made with the class captains, and the entry list will close tonight (December 21). Under no conditions will men not members of the M. I. T. A. A. be allowed to start. Membership tickets may be had of the officers of the Association. Heats in the thirty-five-yard dash will be called at eight P. M. sharp.

C. W. Corbett, Jr., Mgr.

'89. Mr. George A. G. Holman, VI., is in the office of Dewitt Smith, railroad president and capitalist, on Broadway, New York City.
