Buffalo Exposition Notes.

Buffalo will be able to accommodate all the visitors of the Pan-American Exposition next summer. The city has a large number of permanent hotels with accommodations for a great number of guests, besides hundreds of boarding and lodging-houses. In addition, a number of large apartment houses have been converted into hotels, and several caravansaries with accommodations for from one thousand to five thousand persons have been erected near the Exposition Grounds. Many of these are of new fire-proof construction. Outside of all these provisions for the housing of visitors, there will be thrown open more than three thousand private dwelling-houses with an average accommodation for sixteen persons each. It would seem that the arrangements in this regard are better than any before made by a city in which an Exposition has been held.

In view of certain misleading stories which have become current, the Superintendent of the Bureau of General Information of the Pan-American Exposition Company, Mr. W. D. Thayer, reports that Buffalo will be able to care for at least 150,000 persons, while the suburbs can care for at least 50,000 more, and that the rates will be reasonable. The Superintendent says: "There is no shortage of accommodations, and the charges, I am sure, will be much lower than those that have accompanied any other Exposition."

Walker Memorial.

The Northwestern Association are going to send out to each Aluminus an account of what they did at their dinner last month with a rousing appeal for a subscription of an even thirty dollars from each. The other societies will be urged to do their utmost toward increasing the fund. The Memorial Committee have issued a lot of the $30 subscription blanks.

When does Technique come out? This year, Technique will appear at 12 m., Thursday, April 25th, rain or shine.

How may one dollar be invested to insure the greatest returns? Buy a Technique, 1902.
