'02. H. B. Litchman has accepted the position of assistant in metallurgy in the Mining Engineering Department of the Institute.

Student Dinner.

The student dinner last Saturday evening was a farce as to numbers, but those present all had an opportunity to join in an earnest impromptu argument as to the value of the non-technical subjects. The dinners hereafter will be held at six o'clock sharp, in order to accommodate those men who wish to go to the theatre. Next Saturday the Technique, '04, photographer will snap the crowd for this year's book.

The janitors paint the Rogers stairs,  
Each week in efforts vain;  
The students as oft, with never a care,  
Just scuff it off again.
