Mr. N. McLeod has been elected to the business staff of THE TECH.

1906 Class Cancs. should be ordered this week at 29 School Street.

J. Lage won third place in the Harvard Open Junior Fencing Tournament at Cambridge.

Professor A. Rambeau has been appointed lecturer in French for next year at Harvard University.

Ballots for 1904 Class Day election should be handed in at the "Cage" before 1 P.M., Saturday, March 26.

Training for the Track Team began on Tuesday afternoon. Every one intending to come out for the team should report at once.

J. E. Thropp, Jr., III., '94, has been appointed superintendent of the Donora Blast Furnaces of the Carnegie Steel Company.

Men who desire profitable employment for the summer will receive information worth considering by calling at or dropping a postal to P. R. Myrick, 49 College House, Cambridge.

The lecture on "Polyoptikons," which was announced for this evening in the Calendar of last week, is not to be held for the present, but will probably be given some time in April.

The Deutscher Verein is to hold a dinner at the Union this evening at 6 P.M. Several members of the Faculty are expected to be present, and all the members of the Society should be sure to attend. Tickets may be obtained from any of the officers. The next regular meeting will be on Friday, April 1. The hour and place will be announced later. Freshmen and Sophomores interested are urged to join at this meeting.

The Civil Engineering Society will give its sixth lecture on Monday afternoon at 4:15. Mr. Frank B. Gilbreth will speak upon "A Contractor's View of the Baltimore Fire." Mr. Gilbreth is one of the most prominent contracting builders of the East, and is well known at the Institute, not only as the builder of the Lowell Building and Engineering C, but also as a lecturer. Numerous slides which were procured immediately after the fire will be shown. The lecture promises to be very interesting, and a cordial invitation to be present is extended to all those interested in the subject.

Institute Exhibit at St. Louis.

The larger part of the Institute exhibit for the Louisiana Purchase Exposition left Boston last Tuesday for St. Louis. Professor Gardner is to follow within a few days and will have charge of the installation. The exhibit consists of drawings from the Departments of Architecture, Naval Architecture, and Civil and Mechanical Engineering, collections of photographs in albums illustrating the work of the several departments, albums illustrating various phases of student life, including photographs of the classes, athletic teams, and the like. There are also copies of Technique and the Senior Portfolio, photographic enlargements showing students at work in the laboratories, models of vessels made by undergraduates of Course XIII., and similar work of other Courses.

The exhibit is to occupy a floor space of 1,000 square feet on one of the main aisles of the Educational Building, and is by far the most ambitious display ever attempted by the Institute.

It is planned to have an instructor or student continually on duty to explain the exhibit to visitors. Students intending to be at the Fair a week or two may, by spending half of the day at the exhibit, earn sufficient to help pay their expenses. Any wishing to do this should send their names to the Dean.
