THE REPUBLICAN PARADE.

All Tech Must Be in Line Wednesday Night.

The Committees of the Technology and Harvard Corporations, which have been since last Spring considering jointly the possibility of an educational alliance between the two institutions, have almost completed their work. The plan which they have drawn up, and which is satisfactory to both committees, is in the near future to be reported to the Executive Committees of both Corporations. In the case of Technology, before the plan is considered by the Corporation as a whole, it will be submitted to the Faculty; then together with the report of the Faculty, it will be referred to the Alumni, and after they have discussed the matter, the Corporation will take action.

The plan which has been drawn up contemplates a division of the educational field. It is in fact to be an alliance between the two institutions with the object of eliminating competition to the mutual advantage of both. The Lawrence Scientific School will pass out of existence, leaving Technology supreme in applied science, while Harvard will have the more advanced work in pure science. The bachelor's, master's, and doctor's degrees in the former are to be given by Technology as well as the bachelor's degree in the latter, while Harvard will give the master's and doctor's degrees in pure science.

The two institutions will be governed in the same way as heretofore, with the exception that some of the Harvard Corporation, to be chosen by the Technology Corporation, will form a part of the latter, and some of the Technology Corporation, chosen by Harvard, will likewise be delegated to the Harvard Corporation. Each institution will hold its own funds, but the income from such of Harvard's funds, including the McKay millions as are applicable to Technology's field will be turned over to the latter.

Such in general is the plan, one calling for sacrifices from both schools, and one which will be also productive of advantages to both. Its final adoption will depend upon whether Technology and Harvard consider the advantages gained to outweigh the sacrifices made.

Tennis Matches.

Singles: Gatewood vs. Whitney, won by Gatewood; Morrill vs. Reed, won by Reed; Vinton vs. Miller, won by Miller; Clifford vs. Russell, won by Clifford; Strong vs. Fanning, won by Fanning; Polhemus vs. Farrington, won by Farrington; Henry vs. Hill, won by Henry; Culimore vs. Briggs, won by Briggs; Briggs vs. Patch, won by Briggs; Bloede vs. Tappan, won by Bloede. Kenway vs. Nichols, won by Nicholls; Henry vs. Greeney, won by Henry; Lightner vs. Bloede, won by Lightner.

Doubles: Briggs and Ackerman vs. Lightner and Greeley, won by Lightner and Greeley; Nicholls and Hoerner vs. Bloede and Hill, won by Nicholls and Hoerner; Farrington and Culimore vs. Pardee and Clough, won by Farrington and Culimore.

Handicap Meet.

Summary of Saturday's Contest at Technology Field.

The Annual Fall Handicap Games, the first contest on the Technology Field, were run off last Saturday afternoon in the presence of a fair sized audience. All the events were closely contested, and there is every reason for looking forward to a successful season on the track.

The first event of the afternoon was the 100-yard dash. Thirty men started and the first two in each heat qualified for the semi-finals. Leavell, '07 and Richards, '07, won their semi-finals, with ease, finishing five yards ahead of the rest. The final heat, won by Wellington, '08, was closely contested and exciting.

Though there were many entries for the 220-yard dash, only a few men ran, so that only four trial heats were necessary. The best time was made in the second trial heat, won by Leavell. All the runners seemed to lose spirit as they neared the finish.

Eight men started in the quarter-mile. Howes, '06, who started with 8 yards handicap, ran a good race and got second place. Loomin, '08, with 25 yards handicap, ran a steady race, and won by five yards.

There were nine starters in the 880-yard run, and for most part the men showed up well. Nelson finished with a large lead, due much to his 45 yard handicap. Wilson, the scratch man, put up a good race and got second place. Loomin, '08, with 25 yards handicap, ran a steady race, and won by five yards.

The two-mile run furnished the most excitement of the Meet, Lorenz, '06, who was scratch man, quickly overcame the handicaps of the other men. Until the last lap the men were in a bunch, and then Lorenz went to the front, with MacGregor at his heels. Lorenz won by a narrow margin after a hard struggle in the stretch. Clapp, '06, by a hard sprint best Ruggles, '06, winning third place.
