WALTER R. POINTER, PUBLISHER, 208 BOYLSTON ST., BOSTON

An interesting extract from a communication which was recently received from Mr. Humphreys from Alfred T. Waldo's in response to an inquiry in regard to the original Technology colors.

At a meeting of the Class of '79, held early in 1876, the question of a college color came up and a committee was appointed to consider the matter. All the single colors having been adopted by other colleges, the committee turned to combinations of shades. Each member submitted one or more and these were passed upon by the whole committee. The chairman's combination of cardinal red and silver gray was selected. The class voted to accept the committee's choice and to ask the other classes to adopt cardinal and silver gray as the Institute colors, and although this was a move on the part of the first year men, the upper classes acquiesced.

The colors were first used at the college color came up and a committee was appointed to consider the matter. All the single colors received by Mr. Alfred T. Waldo in response to an inquiry in regard to the original Technology colors.

The colors were first used at the college color came up and a committee was appointed to consider the matter. All the single colors received by Mr. Alfred T. Waldo in response to an inquiry in regard to the original Technology colors.

According to the daily papers, the son of President Schurman of Cornell is earning his living at blacksmith work, having been unsuccessful in passing his examinations.

Conklin's

Self-Filling Pen

Under Your Thumb

is the incomparably cleaning and filling device which puts this pen in a distinct class by itself.

"The Pen That Fills Itself"

Conklin's Self-Filling Pen with its self-filling, self-bleeding, and self-trimming mechanism, represents the one radical improvement accomplished since the first ink pen was made. In comfort, convenience and classiness it is a full center instead of the dry pen filler or any other fountain pen on earth. Better not delay. Write today.
