COSTOHT, MASS., MONDAY, NOVEMBER 20,1905.

Pnce Three Cents.

WORK AT TECH HOUSE.

More Men Needed.—Great Opportunities Offered.

The maxim goes that there is a mine of untold wealth in the hearts of the students at Ruxbury. There is an opportunity for every man in the Institute, an opportunity to serve others and help himself. The Tech House is the headquarters of an organization of technical men who undertake to supply class leaders for the settlement work of the Roxbury League. The undertaking is ambitious, but it depends upon the spirit of the Institute men to make it worth while.

CADET OFFICERS APPOINTED.

Last Saturday's run of the Hare and Hound Chase was the most invigorating one held this season. The run started at the Chestnut Hill Pumping Station in Brookline, and the Hares, A. R. Hunter, '08, and E. McC. Smith, '06, laid a trail of seven and one-half miles over Pigeon Hill, through the grounds of the Country Club, and over Walnut Hill, returning by the way of Hammond Pond and Beacon Street. The bags were found by Christiansen, '07, and Milen, '07. The order of finishing was: 1st, Ruggles, '06; 2nd, Christiansen, '07; 3rd, Howland, '08; 4th, Clapp, '08; 5th, Newton, '06; 6th, Campbell, '06. The time of the Hares was 1 hour and 33 minutes, and the time of the Hounds 1 hour and 40 minutes. As Captain Hunter ran Hare, G. H. Ruggles acted as captain of the Hounds.

HARE AND HOUND CHASE.

Last Saturday the men will jog to the course of the handicap cross country race.

MECHANICAL ENGINEERING TRIP.

A special car started from the South Station at 1:00 o'clock on Saturday afternoon, escorted by the members of the Mechanical Engineering Society. The inspection of the Quincy Point Power Station of the Old Colony Street Railway Company, and in particular of the Curtis rolling mill, was the purpose of the excursion. Prof. Miller and Mr. Riley represented the Faculty. The return, made in the same sump as the departure, was begun at 5:29.

MORE HONOR FOR TECH.

Three Tech Men Members of the Nation Academy of Science.

There was held last week in New Haven a convention of the National Academy of Science, which holds the same dignity and authority concerning matters scientific here in America that the Royal Academy of Science possesses in England. The United States Government appointed the original Academy and when puzzled about scientific conundrums often turns to them over this body for debate and consideration. In a way it may claim a position in the scientific world such as the Supreme Court holds in the legal world, for it is a scientific court of the last resort. To be one of the fifty-five members, who are all entered on the membership roll only in the person of the thirty-three members who are graduates of the Institute or officers of the Faculty. These are Prof. Crafts and Prof. A. A. Noyes, and Mr. George E. Hale. One of them is, ever was, or ever hopes to be the Tech Union.

ROCKY TEAM MAY PLAY YALE.

A game with Yale is a possibility at the New Haven Association of Science, which holds the same dignity and authority concerning matters scientific here in America that the Royal Academy of Science possesses in England. The United States Government appointed the original Academy and when puzzled about scientific conundrums often turns to them over this body for debate and consideration.
