THE BIG TREES.

Those who have feared for the future of the famous Big Trees of California may be relieved in mind, for the Government has taken the matter in hand, and, while protecting the forest giants that now exist, will adopt prompt measures for the propagation of the species. The seeds of these huge trees are remarkably small—not so big, indeed, as a buckshot. The trees themselves are slow growers—a fact suggestive of the enormous age of the great Sequoias of California.

The seeds that fall from the Big Trees in their native wilds almost never have a chance to germinate, because the ground is covered with a layer of leaves and other debris some feet in thickness, barring access to the soil beneath. It has been found that, when the trash and brush are burned away, leaving the earth bare, little seedlings spring up in great numbers. Not long ago fourteen hundred seedlings were obtained in this way from under one Sequoia.

MACULLAR PARKER COMPANY.

There is something about our clothing which gives it a decided and attractive individuality perhaps the combination of style, fit, shaping, patterns—all these count in the appearance of a garment. Our new Fall lines are now on our counters and this is a good time to purchase while the stock is fresh and all sizes represented. We call special attention to the handsome patterns in suits for young men.

TECH TO EXPAND.
(Continued from page 1.)

Dr. Prichett in conclusion, "and I don't believe we are going to sit down and let the Lawrence Scientific pass us. Technology is not going to lose the leadership it holds today."

LOWELL INSTITUTE.

St. Clair Baddeley delivered the sixth lecture of his series on "Ancient Rome in the Light of Recent Discoveries" in Huntington Hall last Thursday evening. "Aesopus and his fables" was the subject of his dissertation, and it was listened to by a large and appreciative audience.

The next lecture of the series will be given tonight when Mr. Baddeley will take for his subject, "S. Maria Antiqua."
