The announcement of President Pritchett's resignation from the presidency of Technology came as a

great surprise to all interested in

the Institute and has

A Distinct called forth expressions of loss, that respect from those

Technology connected with it. In

the five years that he has

our executive head, Technology

has made many decisive im-

provements and has continued to

enjoy the prosperity that marked the

previous administrations, so that

now we are stronger than ever be-

fore.

While we feel that the Institute has suffered a distinct loss, still President Pritchett's determination

to devote himself to promoting the

Carnegie Foundation is significant.

To view the effects of the infusion of new blood

into our life were shown by the dis-

tinct broadening and advancement of the

scope of Technology's work.

No better summation of our Presi-

dent's work and influence can be

made than was expressed by Mr. Munroe when he said:

"I have a high appreciation of the work President Pritchett has done for the students in developing

among them a broader understanding of their duties as citizens, a more active social life, and a spirit of

solidarity and mutual helpfulness. His influence in the promotion of sound ideals regarding athletics has been of the best, and he has done much

in improving the conditions

under which young men from a dis-

tance live and in advising them concerning the more important problems of undergraduate life. He has

steadfastly emphasized the fact that

higher education should mean
