"Brown University athletics, from the beginning of the next academic year, will be controlled by the students, subject to faculty approval, as a result of the adoption of rules prescribed by the faculty.

A committee of students from the several classes will be appointed to formulate rules of organization, eligibility, and play.

The above clipping from one of our contemporary college newspapers—which records only one of a large number of instances where the control of college athletics had been placed in the hands of the students—brings before us forcibly a question which Technology men have been discussing more and more widely during the past year: that is, should not Technology undergraduates have a more complete control of Technology athletics?

At present athletics at the Institute are controlled entirely by a committee, known as the Athletic Advisory Council, which is composed of seven members, four of whom are alumni and three of whom are undergraduates. This committee has charge of all the funds of the Athletic Association. It passes upon all the schedules for all the varsity teams. A manager of a team, whether he is an undergraduate or older than students, brings before us forcibly the question of the alumni or the faculty. The main idea of such a plan is that the managers of teams, because elected to their positions by the students, are responsible directly to the students. They are to act under the advice of an alumni or faculty committee, which is to be an "Advisory Council," and not a "Committee in Full Control." Whatever the scheme by which this idea is worked out, there remains the one fundamental fact—the undergraduates should have a more complete control of athletics.

Summer Work.—A few more men wanted for good paying positions, especially men qualified to teach. See A. C. Nichols, '08, at Coge, 1.05-1.15.

INVENTOR.

The Technical Magazine for all Technology Students. Something different from all those you have read. Instructional, and the best invention to solve any problem or men of authority in their special lines. Contributors are Prof. Geo. A. C. Nichols, M. S., F. H. Hillebrand, W. F. Hills, Analytical Chemistry, the D'Aspartograph, etc. 10 cts. at newstands, $1.00 per year.
