Subscription - - - \$1.50 per year in advance.
Single Copies 3 Cents.

In charge of this issue: L. H. KING, 1909

Monday, November 12, 1906.

THE TECH notices with pleasure the announcement that Professor Swain will resume the course of readings begun last year and will continue them throughout the present term. Last year the students in the Civil and Sanitary Courses were invited to a series of readings on general subjects which the reader thought helpful and inspiring to young men in college. Technical subjects were not included and among the selections were many examples not only of biography and essays but in the whole field of literature. The readings were largely attended and were greatly appreciated by all who were able to be present. This year the same plan will be carried out and the first reading will occur Monday, November 19, in 6 Lowell, at 4 o'clock. All students in Civil and Sanitary Engineering are invited and there is no doubt that the readings will be of great benefit.

The Convocation last Thursday with Dr. Hamilton of Tufts College for speaker brings to mind the opportunity which is offered here at Technology for coming into touch with great thinkers of the time. It has been the custom during President Pritchett's administration—and we hope it will continue to be so under future Presidents—to have men of prominence in the world of today speak before the students. This is perhaps as great an opportunity as is offered to any body of undergraduates in this country. Doubtless this is due to the fact that we are situated in a center of educational interests and thus are able to come in contact with some of the broadest thinkers of our time. President Pritchett has invited

such men as Dr. Van Dyke of Princeton, President Faunce of Brown, Booker Washington, and others in the past, and hopes to have with us Dr. Van Dyke again and President Tucker of Dartmouth this year. These are men we will be very unlikely to meet after we leave the Institute and these opportunities of broadening and liberalizing our education are invaluable. Each individual is responsible for that part of his education which lies outside of the range of the text book and instructor and we should feel grateful for such excellent opportunities as the convocations offer.

1910 BEATS WORCESTER HIGH.

The Freshman football team journeyed to Worcester Saturday afternoon and defeated Worcester High 6 to 0. Worcester played a great game against a heavier team and, but for the poor generalship of the quarterback, would have scored more than once. Their line held like a stone wall on the defense, and at all times ripped the Tech line to pieces.

The Freshmen's only score was made in three minutes of play, during which the team did its only good playing. After that the team seemed to go to pieces, and Worcester did about as it pleased. Trick plays were tried but almost invariably failed. On straight plays, the interference was not always what it should have been.

The individual playing was brilliant at moments, but that all-necessary requisite for victories, team play, was not present. The prospects for a Freshman football victory on Field Day are by no means bright, and it is only by the hardest work that the team will make a good showing against the Sophomores, who are improving every day.

TECH, 1910.	WORCESTER HIGH.
Emerson, i.e.	r.e., Donnelly
Amsden, i.t.	r.t., Butler
Manson, i.g.	r.g., Sullivan
Roberts, c.	c., Mylen
Terry, r.g.	i.g., Warren
Leavens, r.t.	i.t., Steele
Hinds, r.e.	i.e., Melican

WILLIAM READ & SONS

107 Washington Street, Boston, Mass.

The store of Browning, King & Co., 407-409-411 Washington Street, just north of Winter Street, and right in the heart of the city's shopping district, is a four-story treasure home for the man or boy who is looking for the best that there is in Clothing, Hats and Furnishings.

It is one of sixteen retail stores through which all the products of their Cooper Square, New York, workshops are distributed directly to the consumer.

Something more than fifty years ago this business was established, and its success has been built upon the solid foundation of satisfaction to the purchaser.

No better clothing is made than that bearing the name of Browning, King & Co., and no other manufacturing retailers make under their own roof, from start to finish, from the designing and cutting to the tailoring and finishing, all the clothing that they sell.

Browning, King & Co. are the originators and sole makers of the regular and half sizes in clothing, and they offer a greater variety of patterns to choose from than any other single shop can show.
