Mr. Lewis to Address Civils.

The Civil Engineering Society has secured Mr. William W. Lewis, Tech '94, at present with the Boston Rapid Transit Company, to speak at the regular meeting next Friday afternoon at 4:15 to 5:15. Mr. Lewis will be remembered by some of the older members of the Society as having given a most interesting description of the work on the East Boston Tunnel some years ago. His subject this time will be "The Construction of the Washington Street Subway," and close acquaintance with every feature of the undertaking fits Mr. Lewis especially for such a task.

Early next week, at a date to be fixed, the Engineering Society will make the excursion through the Subway, which was promised some time ago and unavoidably postponed. Mr. Lewis's description of the work will make it possible for those expecting to go out in the annual handicap cross country run over the eight mile course in West Roxbury, September 9th, 90, with a handicap of seven minutes, led the field almost the entire distance and finished in excellent form with a lead of five yards over Lenox, '09. The best time was made by Howland, '08, who finished in 41:20.7, and would probably have equalled the record had he been more familiar with the course. Johnson, '06, kept trail and did not finish. The order of finishing follows:

Handicap Run
