undergraduate reasoning. The student comes to the Institute for
the sake of its opportunities for work, paying a considerable price
in time as well as in money. Therefore that the student must
be subjected to a partial withdrawal of the opportunity, and reluctance of the
faculty. That it may even be deemed ungenerous.

How long should these short intermissions be? There is
that increase in their combined duration will be either at the expense of the short school year of
the summer vacation? Some fifty per cent of the summer students
may be best for a particular minority of
students. Beyond a certain limit, different for different per-
tions, a few days vacation becomes a harmful interruption rather than a
means of recuperation.

The advantage of our Institute vacation may be worth mentioning
at this time, before that vacation comes. The attractions of the
New England mountains for the vacation pedestrian in summer
may be worth mentioning. The student of slender
advantage to those teachers and
comes. The attractions of the
vacation may be worth mentioning
are exceptional, and may be best for a particular minority of
students. Beyond a certain
limit, different for different per-
tions, a few days vacation becomes a
moral injury rather than a
means of recuperation.
