ATHLETIC EVENTS POSTPONED

Bad Weather Last Saturday Upset All Plans for the Day.

Bad weather conditions Saturday upset the complete athletic program for the day. The Junior and Sophomore baseball teams were forced to give up their games in the afternoon and the Rifle Club and Hare and Hound Associations were also forced to abandon their plans.

The hare and hound chase at Wellesley which had been anticipated with so much interest has been postponed to May 8th. The freshmen and Sophomores who are going into the class cross-country race will meet at the field Wednesday afternoon to limber up and will walk over the course Friday morning.

The track junior team was to have placed Somerville High nine Saturday afternoon and gave up the game with much regret. Somerville High, who have to date and the Juniors had hoped for a victory. The Sophomores were scheduled to play Higland at the field.

The men who suffered most from the lay-off Saturday were the track men, most of whom are working hard to get into condition for the spring games which take place next Saturday.

MUST QUALIFY FOR EVENTS.

By winning a first, second, or third in an event next Saturday is positively the last and only chance to make the varsity Track team this year. The class games Saturday will be run off in the following order:

Track events—2.30, 880-yard dash; 2.45, 100-yard dash; 3.00, 120-yard high hurdles; 3.15, one mile run; 3.30, 440-yard dash; 3.45, 220-yard low hurdles; 4.00, 440-yard dash; 4.15, two mile run.

Field events—2.30, high jump and discus throw; 3.45, pole vault.

The results in both events are higher in examination, they are less in effect owing to the height of the ceiling. In 23 Walker, however, a smaller proportion is by far more appreciable. The tars of sea in extending to within a few feet of the ceiling in rear of room are known to be extremely uncomfortable and, as some of their occupants have expressed, they are "veritable sweat boxes" especially after the room has been occupied a few minutes.

Most unhealthy conditions exist

Atmospheric Conditions in the Lecture Halls of Institute Endanger the Health of Occupants. These Conditions can be Remedied.

That the most alarming conditions exist in our midst is shown by the results of the recent examination of the atmospheric conditions in some of the lecture rooms of the Institute buildings. For some time past there has been repeated complaint at the particularly stifling conditions in these rooms, but it is fairly and accurately an investigation of the cause and of the true state of affairs by Ten Tract that a definite estimation of the harm that is constantly being done knowledge and studying to improve their fellows by enabling them to live under more healthful conditions, many members of the Sophomore Class are daily submitting proofs that they are suffering worse than any which at present prevail in the oldest Boston theatres.

The results which were secured from the Chemical Department and the Food Laboratory under the careful supervision of Mrs. Richards show that at least parts of carbon dioxide are present in 10,000 parts of air, in this room. In the lecture halls in Others it has been found that the conditions are even worse for here as high as fourteen parts of carbon dioxide to the 10,000 exist.

While the results in Rogers are higher in examination, they are less in effect owing to the height of the ceiling. In 23 Walker, however, a smaller proportion is by far more appreciable. The tars of sea in extending to within a few feet of the ceiling in rear of room are known to be extremely uncomfortable and, as some of their occupants have expressed, they are "veritable sweat boxes" especially after the room has been occupied a few minutes.

(Continued on Page 6.)

SUMMER COURSES ARE ANNOUNCED.

The circular on the summer courses which the Institute will give this coming summer has just been issued. The number of subjects to be given is the same as usual and includes Analytic Geometry, Integral Calculus, Applied Mechanics, Mechanical Arts, Mechanical Drawing and Descriptive Geometry, Modern Languages, Chemistry, Physics, Civil Engineering, Mechanical Engineering, Architecture, and Biology.

The requirements for admission will be: in general a work conscientiously done and the final examinations are expected to correspond with those of the regular school year. The courses are given both for those who wish to distribute their work in the physics lecture rooms and for those who wish to make up deficiencies. The continuity of effort and freedom from interruption made possible by summer work are of particular value in many of the laboratory courses.

OFFICERS NEEDED FOR CORPS.

A recent graduate of the Institute, who is now a member of the Junior Unit, has called the Institute a few days ago. He was very enthusiastic over his work as an army officer, and believes that there is a particularly good field for Institute graduates in the army corps. There is just at this time a large opening for new officers, as there are no second lieutenants in this branch of the army.

Company D HONORED.

Company D, J. T. Battalion, has been selected to take part at the Military Levee to be held by the Boston National Louis on Thursday, May 2 at 8 P.M. in Mechanics Hall. Captain Bingham's company will consist of 36 men, all of whom will receive one ticket. Each company is to drill individually for about twenty minutes.

MONEY IS DUE TODAY.

Subscriptions for the Junior Prom must be paid today. The amount due is $5 and this amount must be paid by this afternoon. The committee of Juniors in charge of the Prom point out that the people who "signed up" for the Prom has in reality signed a note in which he promises to pay $5 on or before April 15. The money may be given to McGuigan, Gerrish, Putnam, Welsh, Rollpe, or Glover.

DINE FOR TENTH TIME.

Tuesday, April 16.

1200 P.M. Gym Team Candidates Report at the Y. M. C. A.

NOTICES.
