NORTHFIELD.

The Twenty-second Annual Student Conference for the Eastern states and Canada will be held at Northfield, Massachusetts, from Friday evening, June 28, until Monday morning, July 8. The Conference will very likely exceed in attendance and interest of the Conferences of previous years. Nine other gatherings in different sections of the continent had conducted along similar lines, have been arranged by those in charge of the general work of the Student Christian Associations of North America.

The Northfield Conference originated some years ago and has grown each year until now nearly eight hundred men representing practically every college and university and vocational school in the Eastern States and Canada assemble on the campus of the Northfield Seminary for ten days of recreation and conference.

The picturesque location of Northfield and the beauty that surrounds it afford abundant opportunity for interesting excursions. For those fond of swimming and boating the Connecticut is equally attractive because of the white mountains and overlooking the Connecticut river. It contributes largely to the pleasure of the Conference.

The very fact that Columbia is in Toronto, or our own city; something larger, ever, than the great country, to whose service we ought all to be glad to dedicate our lives.

The Technology Delegation.

There will be a supper (35 cts. a plate) and discussion at Tech Union from 6 to 7:30 p.m. on Saturday night, May 18, for those interested in the Northfield Conference. The various phases of life at the conference will be described by men who have attended in other years and these talks will be followed by a general discussion on the subject of Northfield.

Tech songs and yells will also be rehearsed in preparation for their use on various occasions at the conference. Data concerning expense, the routes by which M. I. T. will be reached and the general daily program of the conference will be given at that time. Any men at all interested in sending a strong Technical delegation should plan to be present. Seven men have already expressed their intention of going to Northfield. This number ought to be raised to twenty-five if M. I. T. is to take the lead among the Technical colleges in the east in this kind of work as well as in the professional line. Worester Polytechnic Institute had six or eight men there last year, while Johns Hopkins had several more. M. I. T. should not only lead these institutions.

Conference Buildings, Campus, and Connecticut River

This historic New England town in the northlands of the White Mountains and overlooking the Connecticut river-valley, contributes largely to the pleasure of the time spent at the Conference.
