PRESIDENT WHEELER.
(Continued from Page 1.)

in 1875, he was class orator. From 1875 to 1879 he was teacher in the classical department of the Providence high school and for the next two years in Brown. He then went abroad and the years 1881-85 were spent at Leipzig, Heidelberg, Jena, and Berlin. At the close of his studies he received the degree of Ph.D., summa cum laude, at Heidelberg. On his return he was appointed instructor in Harvard, but the following year, 1886, was elected professor of comparative philology at Cornell.

Professor Wheeler was appointed professor of Greek in the American School of Classical Studies at Athens in 1896 and in 1899 became the head of the University of California. He was mentioned as a possible successor of President Eliot of Harvard in 1901, while Brown sought him as head in 1897. Besides his name as an organizer, educator, and linguist, one of his chief claims to renown lies in his ability as an author.

While at Cornell Prof. Wheeler was in active charge of the system of athletics, and he has taken the most lively interest in the athletic sports at the various institutions at which he has taught. Perhaps no one has done so much active work to raise the tone of college athletics as Prof. Wheeler, both by speeches and suggestions and by putting into actual practice his ideas on the subject.

MACHINE LABORATORY.
(Continued from Page 3.)

This is unqualifiedly the age of machinery. Production by hand is passing, never to return. Perhaps no one has done so much active work to raise the tone of athletics as Prof. Wheeler, both by speeches and suggestions and by putting into actual practice his ideas on the subject.

This is particularly important to technical students whose time is so limited, as it enables them to obtain a comprehensive knowledge of a large subject, both in theory and practice, rapidly and systematically.

It is also of the greatest value to engineering and manufacturing industries, for such students are carefully trained in those principles that make them useful and available at once for important positions.

This is unqualifiedly the age of machinery. Production by hand is passing, never to return. Perhaps no one has done so much active work to raise the tone of athletics as Prof. Wheeler, both by speeches and suggestions and by putting into actual practice his ideas on the subject.
