THE TECH
Published every Monday, Wednesday, and Friday during the academic year. Issued September 28, 1906, by the Massachusetts Institute of Technology.

Editorial Staff
M. E. Denny, 1906, Editor-in-Chief
W. H. Fullmer, 1907, Managing Editor
H. W. Hinkin, 1907, Art Editor
L. R. Burdick, 1906, Business Manager
R. S. Cluett, 1906, Business Manager

Business Staff
R. F. Parlin, 1907, Advertisements
P. B. Lord, 1907, Business Manager
A. G. Hymans, 1907, Circulation Manager

Exchange of this issue: W. D. Dak. 1907

Tuesday, June 4, 1907

The Tech regrets to announce that in the organization of the Board of Editors for next year, Mr. Maurice E. Denny, has been elected Editor-in-Chief. Mr. W. Fred Dolke, Jr., has been selected Managing Editor, and Mr. Raymond W. Parlin, 1906, as Business Manager.

In planning the work for next year, the feasibility of expanding the Tech into a daily newspaper was given an earnest discussion, but it seemed that this could not be done without a larger financial effort in the Institute, for the near future at least, as a tri-weekly. However, in order to give each issue a fuller and more interesting content, "write-up," the size of the sheet will be expanded to five columns in width, and the length proportionately increased.

The number of the Editorial Board is to be decreased to the lowest number possible with the highest efficiency. The feasibility of decreasing the subscription price to one dollar per year was also discussed, with the sincere hope that the decrease might be made. However, in view of the fact that many extra expenditures have been placed on us for the last year, it has been found necessary to maintain the same subscription price.

The report is finding currency with the most promising institutions of learning. The truth were that the great railroad, industrial and mining corporations are finding currency with the highest efficiency.
