PSYCHOLOGY AS A STUDY.

Discussion by Prof. Swain. A Man Has Two Egos.

The power of an individual over his self was the subject of Prof. Swain's talk yesterday afternoon. He first advised everyone to read Thomas J. Hadley's "The Law of Psychic Phenomena," "A Scientific Demonstration of the Dual Life," "The Law of Mental Healing," and "The New Age of Man." He also advised all to try "The Witching Hour," a play which deals with psychology.

Prof. Swain, however, declared that every man ought to know a little about psychology in order to be hand-minded.

The study of mental phenomena, or what scientists used to call telepathy, has recently become a regular scientific study and some of the best men have taken up the study. The study has shown that man has two "selves" - a self up of rations which he called his subjective and objective.

Prof. Swain gave an example of the working of the subjectives and objectives. A man thought of going to Brooklyn by the boat. He then read. The man's date was then read. This was followed by the distribution of gifts from the actresses, two new numbers, and the refreshments.
