The Science Review aims to develop closer relations among the institutions in and around Boston, and to furnish a weekly account of the work of the College. It is in many respects an engineering newspaper, but does not confine itself exclusively to the department of education at Tech and the responsibilities of the professional man.

PROF. SHADD INSPECTS CORNELL.

(Continued from page 2.)

Dillon has been the talk of the town this week. Dillon won the boys' years at the time of the Yale-Harvard game. He is a member of the Freshman class at Cornell, was here Monday afternoon. There ought to be plenty of room at Tech because of the lack of Tech students.

There is plenty of room at Cornell. The Physics building has been recently enlarged over the electrical department which very easily accommodates the hundred or so students who have been made. It is very advantageous to have the laboratory compactly arranged in the same room as here at Tech.

The spirit is simply irresistible at Cornell. Every one of the seniors in "coldness" is a member of the local student branch of the American Institute of Electrical Engineers.

Professor Shadin is very enthusiastically carried out by the Tech Electricians. Mr. F. E. B. is one of the most interesting of all the officers and Prof. F. E. B. and Prof. F. E. B. are here. Prof. W. W. L. is the head of the department at Cornell, was here at the time of the Tech-Harvard game.

"One thing is certain," Prof. Shadin says, "Cornell turns out men who know how to work the one object of Tech."
