CROSS COUNTRY TO START WORK SOON.

INTER-COURSE PLANNED.

Easy Runs will be Taken from the Gym and Hare and Hounds Runs will be resumed.

Crosstown work for the coming season will be taken up again in earnest. Light training for the distance and cross country races will begin at 5 o'clock, and from then on easy work will be done.

The plan is to develop as much as possible any latent running ability that may exist at Tech, and to this end, and to encourage as many as possible who are beginners, distance work to come out, the work at first will be very easy.

Therefore, every man, henceforth, will be welcomed and expected at the runs, which will be held every Saturday afternoon at 3, and Tuesdays and Thursdays at 5. This will obviate the possibility of interference with school work.

As soon as the ground is in decent shape the weekly hare and hounds runs which have proven so much great value will be resumed. The plan tried last year of dividing the men into a slow bunch and a fast bunch will be taken up again. This will be used both in the hare and hounds runs and in the runs from the gym.

To give the men more experience in races will be taken up again. This needs to hold a cross country race between the different courses at the Institute. This is an entirely new step, and should always great interest. Last year a Freshman-Sophomore run was held, but no regular intercourse meet has ever taken place. The date of the run has not yet been decided upon.

Ollie, who won the two-mile last year at the New England intercollegiate meet, breaking the record, continues to hold a cross country crown between the different courses of the Institute. This is not an unimportant fact that good men are entering in large numbers from the Freshman and Sophomore classes.

In the early stages it looked like an unusual year, but now the distance and cross country men will begin. It is difficult to forecast the outcome, but a few good men are beginning to show up for the work.

The Fourth-year laboratory list in the department of mining is being revised. The second-year students have been asked to come up to the laboratory.

A new compressor has been added to the other weights have been brought in from the Lowell building. It is highly important, therefore, that all the members of the weight squad show up at the first practice today.

Coach Kanaly will meet the men there and give them a talk about the work that will be done. He will also arrange some other time for those who would find it inconvenient to come out at 4 o'clock.

TheHeavyweight Trio and Hare and Hounds Runs at 4:30 o'clock and if necessary will arrange some other time.

Two meets that appeared on the schedule of the meeting team have just been cancelled. Notice to that effect being recently received by Manager Moore, Harvard has included her in the meeting list of men for the season at her loss to her team of two men. An effort will be made, however, by Manager Moore to arrange for some kind of meeting. It is also necessary that the intercollegiate contest be arranged. The meet does remain--Boston and Dartmouth.

HARVEST TIMES HIT MINING GRADS.

A FEW OUT OF WORK.

Many Welcome Vacation. New Apparatus. Register of Mining Students.

That the recent panic and tightness of the money market has affected the mining industries, this being felt by the graduates from the mining department, is the report from the Institute mining department.

A few graduates have written to Prof. Richardson, head of the department, asking for places, while quite a number are taking advantage of the hard times to get a vacation which they have not had in recent times.

Among the former students of the mining course who have called at the Institute recently is a graduate who is changing from Sault Ste. Marie to Cohobison, Ohio, Mr. W. A. Parkinson, whose establishment has shut down.

The other weights have been brought in from the Lowell building.

Mr. A. F. Bennett, who is on vacation from Mexico, Mr. T. G. Frei, and Mr. A. F. Bennett, who is on vacation from Chino, Mr. W. T. Winnick, in Boston on some business, and Messrs. Strong, A. B. H. Arnold and Prof. Cal-

There have been recently added to the apparatus in the mining department two new polisher clamps, and one new piston jar, proper to the disposal of the students.

There has been installed a new table top with competent provision, and a new lathe jar and two new compressors have been added to the plant. There is in contemplation a completely new machine.

In the direction of former work and metallography, in the last issue the volume of the oxygen has been introduced for the making of complete computation of lost developed and the distribution of best, and a new Portland cement furnace, a new Portland cement furnace, have been added to the apparatus.

The fourth-year laboratory list in the department of mining has been revised. The second-year students have been asked to come up to the lab.
