AMALGAMATION.

The intercollegiate track association, of which the Tech has just recently been a member, this year has seen its fullest development. It is a central idea of this association that the work of the two neighboring colleges should be combined, and that the association should become a sort of national organization. This idea has been realized in the formation of the new association, and the Tech is one of the first colleges to join it.

Captain W. E. L. Leavitt, of the Los Angeles Times, was the first to suggest the idea of amalgamation, and he was followed by Professor W. F. L. W. Lanham, of the University of California. The Tech and the University of California are the only colleges that have joined the association so far, but it is expected that other colleges will follow suit in the near future.

The Tech has joined the association because it believes that the amalgamation of track and cross-country teams will be of great benefit to both the Tech and the University of California. The Tech is interested in both sports, and it is felt that the amalgamation will enable both teams to benefit from the same training and facilities.

The Tech has already made several suggestions for the improvement of the association, and it is hoped that the other colleges will follow suit. The Tech is confident that the amalgamation will be a great success, and it looks forward to working closely with the University of California in the future.
