In REVIEW.

The action of the Institute Committee for the new Union, its membership and bringing into the body a large number of athletic captains and managing the erection and widening the representation on the Board of Trustees, has given great development in student government and activities during the present school year. A marked advance in all lines of student success has been noted, but the degree or quantity is hard to appreciate in the absence of the old body, which made great advance in the management of athletics by deputizing and forwarding with great ad

The change to a small body made up of the old athletic association, made up in membership of elected officers, is a step forward to take either the responsibility or proper action in vital matters in student control of athletics. This imp

administration of effort and cooperation in student government and activities during the present school year, and taking into consideration the fact that the old body, undeniably best work, never took such action, one can not feel as if the way of development, co-ordinating effort and co-operation in athletic enterprises as when it made the necessary change. If this body does not, at its own volition, solve the many stu-
