Generating 150 horse power each. One of these has been reset during the sum- mer in the power plant of Lowell, south of the old boiler plant. The carburetor shop, originally on the second floor of the latter building, has been moved into the old boiler room. On the ground floor the old pipe shop has been lowered four feet to bring it on a level with the Lowell power plant and has been cleaned room for two 500 horse- power water tube boilers, each capable of producing 400 pounds pressure. Facilities for a new pipe shop have been provided in the southwest end of the Copley Hall building.

The office of the chief engineer has been removed to Lowell building in a position overlooking both boiler plants. An old smoke stack behind engineering A has been removed and all present boilers will connect with a large stack near the electrical engineering building.

A tunnel fourteen feet wide, connect- ing the two boiler rooms, has been con- structed and at a point midway be- tween the boilers a turn table has been set. From this point a second tunnel six feet wide extends into the basement of Copley Hall, where the coal will be transferred in from Clarendon street. The coal will be conveyed as needed in one- ton cars to the boiler rooms, where it will be fired to the boilers directly from the cars.

In the basement of the Pierce build- ing about two-thirds of the old Tech engineering department has been re- moved, has been added to the labora- tory space of the mechanical engineer- ing department. The recently acquired three kilowatt Parsons turbine with general arrangements and bearings in the room will be installed. The electric- ity to be made by this Parsons turbine, which is considered the most important addition in recent years to the mechanical engi- neering department, was manufactured by the Westinghouse company, who made the Institute a lib- eral donation, the difference being kindly furnished by members of the visiting committee of the department.

Faculty Changes

Several changes in the instructing staff, taking effect with the opening of the school year, have been made. From the chemical department the following members of the Institute to enter new positions: W. W. Kennedy, R. B. Shields, H. W. Mahr, and C. R. Drag- don. Mosson, R. B. Gale and G. J. White will devote their full time to ad- vanced work for a higher degree, the latter at Johns Hopkins. C. L. Pre- body will be transferred from the analy- tical laboratory to that of technical an- alysis, G. J. Niciter on from inorganic to analytical chemistry, Dr. E. E. Spear from Analytical to Inorganic, B. G. Woodbridge, Jr., from organic to ana- lytical. The new assistants are C. W. Clark, industrial chemistry; H. S. Chandler, organic chemistry; W. H. Toppan and A. B. Babbcock, theoretical chemistry. Dr. W. R. Whitney has been appointed non-resident professor of chemical research.

Waldemar Lindgren, of the United States geological survey, has been ap- pointed lecturer in economic geology, succeeding Professor Kemp. Dr. W. W. Atwood has been appointed assistant professor of paleontology, and C. H. Clapp instructor in geology. Allen French, 1886, after a year of satisfac- tory work in the English department, has resigned to teach at Harvard. He will be succeeded by Sidney Guss of Dalhousie and Harvard.

NOTICES

MANDOLIN CLUB—Meeting of mem- bers Saturday at 1 P.M. in Social Room of New Union for election of new leader. Colesman will not be back.

NOTICE—Candidates for the 1911 football team will report to Manager Williams at the Oval, Wednesday at 4 o'clock. Gone prepared for scrimmag- ing.

Hockey Team—Meets at Union to elect captain Saturday 11.00 P.M. Members of last year's team and substitutes eligible to vote.
