A Faculty Changes

The mathematics department has gained in its instructional staff since A. Miller, who was in the department in the Institute since 1902, has resigned to take a position in business at Elkhorn, N. Y. Dr. W. H. Hoeber, who was appointed in 1901 and who, in 1905, has accepted an assistant professorship at Washington University, St. Louis, of which he is a graduate. In organic chemistry, N. J. Lemons, who was appointed instructor for the year of Dr. Moore's sojourn in Italy, has received an appointment at Brown.

The following have received promotions from the position of instructor to that of assistant professor in their respective departments: Ervin Kemister, drawing and descriptive geometry; Alphonse B. Goodnow, food analysis; Joseph C. Wiley and Charles W. Berry, mechanical engineering; Harrison W. Haverstock, applied mechanics; Harry Bradly, drawing and descriptive geometry; and Homer A. Blanchard, mechanical engineering.

The following who were instructors in the mechanical engineering department last year have received appointments as instructors: I. H. Headley, mechanical; Malcolm C. MacKenzie, John H. Locke, '96, in civil engineering; and D. W. Milroy, electrical.

The mathematics department has obtained Captain C. C. Carter (West Point, 1909) to spend the coming year at the Institute in the capacity of professor of trigonometry and astronomy. Captain Carter has been an instructor in the Artillery School at Fort Monroe and in the Submarine Defense at Fort Totten, besides serving on the United States' artillery board and on the United States' torpedo board. It is now probable that he will be on a more advanced course of instruction in officer to the school at Fort Monroe, and Captain Carter has been detailed to study the coming year for the purpose of preparing himself to give instruction in this advanced work, which will include a considerable assignment of electrical engineering.

FACULTY CHANGES

The Technical Review is a quarterly magazine devoted to the interests of the Massachusetts Institute of Technology and published by the association of class secretaries. Its purpose is to develop closer relations among the alumni of the Institute and to keep alumni informed of current events in the work of the College. It is published in engineering plants throughout the country, and mailed to graduates in all branches of the Institute.

The Review is sold at Newbury Street, Boston, and is published by the Massachusetts Institute of Technology. It is mailed to all alumni and is sold at the Institute.

A G. SPALDING & BROS.

The Largest Manufacturers in the World of Official Athletic Supplies

Foot Ball, Basketball, Ice Skates, Hockey, Golf, Gymnasium Apparatus

Official Implements for all Track and Field Sports. Uniforms for all Athletic Sports

Spalding's Handsomely Illustrated Catalogues of Official Athletic Supplies are mailable free anywhere.

A. G. SPALDING & BROS.

New York, Boston, Buffalo, Syracuse, Washington, Chicago, St. Louis, Denver, Kansas City, Cleveland, St. Petersburg, Fort Worth, San Francisco, Minneapolis, New Orleans, Cleveland, London, Etc.
