LEATHER CHEMISTS

The annual meeting of the American Leather Chemists Association will be held at the Hotel Brunswick on Thursday and Friday of this week. Those members of the leather industry who are members of the Association are requested to come and join their colleagues in discussion of various phases of the leather industry. Dr. W. G. Daill will have the pleasure of addressing the meeting on the subject of leather chemistry.

COMMUNICATION

At the Institute there is great need of learning just how clearly a student understands the subject he is studying. It is hoped that students will upvote questions thoroughly and carefully, and that the work they are doing will be so done that the students will be led by the courses of study he has chosen, and be atted and prepared for the examinations to be held in April. Last year several separate trials were held, but this year the two races came so close together that it seemed advisable to have the Harvard race serve as the trials for the Princeton team. The inter-varsity team is as follows:—H. H. Howland, 1910, L. O. Mills 1910, H. F. McCarthy 1909, K. Jacobs 1910, C. F. Strode 1910, H. J. Stephenson 1910, G. T. Stiern 1910, and R. Ellis 1909, captain. J. D. MacKenzie is to be the substitute.

The Tech regrets to announce the resignation of Richard St. John as manager of the business staff, and of Harold Long Robison 1911, from the news staff. George Baskford Terri- sale of United States must be renewed. The subscriptions are required to be made out to the Business Manager, to whom they should be addressed. The subscriptions are $0.50 per year, and single copies are $0.25 each.
