REVIEWS OF SEASON

Institute Team Has Played Sixteen Games Won Nine and Lost Seven

Theodore Ricewell Parker 1011, has been elected captain of the Institute basket-ball team for the season of 1910-

Parker comes from Woburn, Mass., while three years ago he played on the high school basketball, football and baseball teams.

At the Institute he has played on both 1911 tug-of-war teams, played on the fall baseball team last spring, and on the various teams, basketball teams.

On the basketball team he has won special recognition on account of his tenacity at center and forward. He was for a time placed by the director for the position of center on the All New England basketball team, and is one of the most successful in the history of the Union basketball team.

PROF. DEWEY A TRUSTEE

REBUILDING OF ROADS

One of the most successful seasons that an institute basketball team has ever gone through, and the prospects are bright for another successful season under Parker's leadership, as none of the team will leave the Institute this June.

BULLETIN BOARDS

Recently small strips have been placed on the bulletin boards for the benefit of those who do not desire to see tasks. If posters are only placed on the bulletin boards, they are more likely to be inserted in the bulletin boards.

It would be great aid and saving of time if the board committee would inform the organizations who put up their posters, in as far as possible, where to put them.

The old bulletin board for small notices has been divided into small five-inch squares for small notices, while the old bulletin board is to be used as present to the small bulletin board in the Union. Posters must be uniform in size, neatly printed, and dated. All posters present on the bulletin board will be removed within a week, unless they conform to proper regulations.

CROSS-COUNTRY DINNER TOMORROW

Hare and Hound Run Will Be Held in Waban—Kanally Calls the Course Best About Boston

Waban is to be some of this Saturday's regular hare and hound run. This popular, plain furniture, according to travel guides, should have been plucked out in the Union. The lesser battles of the Waban School are to be at the disposal of the runners, and another large audience is expected. W. C. P. '10, will have the hounds out, and one at a time to lay the course, which is about four and one-half miles long. The spread will be divided into two divisions, one of slow and one of fast men, and the competition will be keenly contested. The train for Waban will leave Trinity Place at 2:00 P.M.

Directly after the run a cross-country dinner will be held in the Union, at six o'clock. The hunt has been set early in order that the men may come directly from Waban and not have to keep their appetites waiting. Anyone interested in the cross-country man, track man, or only an interested spectator, is invited to attend this dinner.

Dr. A. Rockwell 1906 will be the principal speaker. Dr. Rockwell, in his day, was one of the best organized athletes the Institute ever had, and has shown his loyalty to Technology, and to Waban ever since. Recently he has offered the Rockwell Cup for the quarter mile event at the Waban Memorial exhibition in the Union with two others. This cup is to be given to the permanent trophy of the winner of the event, and to be awarded every year. Dr. Rockwell is on the Advisory Committee, and has served there for many years. His talk will be of interest to every Trek man.

Residing in Waban, Capt. C. W. Gram 1900, of the track team, and Elwood Davis R. Dewey, professor of economics, were invited to attend the dinner.

Exeter club dinners will be present. As it was an informal affair, no distinguished speakers were forthcoming.

Dinner was served at 6 o'clock, and a very enjoyable time was had. Following, there was a speaking program with the program for the betterment of the club, but no definite action was taken. The party broke up about 8:30 o'clock.

TECHNIQUE FINISHED

Work of All Departments Is Now Ready for the Printer

On Technique 1010, has finally been completed. All the work in the various departments has been finished and proofed, and it is now in shop for the final printing. The bulk of the work on Technique was finished two weeks ago, before the election left the Institute, and as soon as the engraving finishes the cuts, the book will be sent to press.

Some features will appear in this year's Technique. The principal ones are the paper houses in their mechanical details of publication. Some departments prominent in past volumes have been cut down and others enlarged. It having been the in-1itre of the Board of Jury to bring out a Year Book that will be useful both on account of its excellence, and because of its being a pleasure in several lines of Year Book work.

PROF. DEWEY A TRUSTEE

Davis R. Dewey, professor of economics, was present on Wednesday by Governor Draper a member of the Board of Trustees of the Massachusetts Agricultural College, to secure the late Carroll D. Wright, professor Dewey is in charge of the department of economics and statistics at Technology.
