Subscription - - - \$1.50 per year in advance.
 Single Copies 3 Cents.

Printed by Old Colony Press, Boston.

Friday, March 26, 1909.

Have you signed up for Technique?

"One of the best of the profession is head of the department of geology of the Institute."

In view of the fact that it is only by private subscription that the relay team is able to go to Philadelphia everyone should contribute his share. The team made good indoors and will probably win at Pennsylvania. Everyone help.

To those who are not exceeding the point system limit, the Tech would re-

commend the consideration of the column advertisement on page four of this issue. A chance to get some more points and do as much as your neighbor! If you are alive, or want to show that you are, you will connect yourself with some Tech activity. The Tech at present offers the most attractive opportunities to every one that will make a try. Whatever you do, talk over the matter with the business manager or managing editor, and do it now.

The Tech learns from a former chase captain that the hare and hounds runs this spring have been better attended than in any previous spring season. This is the kind of work and enthusiasm that will turn out a winning track team this spring and develop a championship cross country team next fall. Tech nology should not be contented with striving for second place in any branch of athletics with the first-rate material available any more than Technology should be considered second in any branch of science. The inter-course race to be held April 3 is more than a practice run, it is direct preparation for the track team and the first preliminary run of the cross country team of next fall. Now is the time to get in shape and begin working for that "T."

TECH'S NEW STORE

Attention is called to the fact that Technology now has another addition to its list of student supply shops. Charles J. S. Rudolf, formerly of Park Square, has opened a shop directly opposite Roger's, which is called the Tech Tog Shop, and is decorated in Red and Gray. A complete and up-to-date line of young men's furnishings is carried, including shirts, collars, neckwear, gloves, hats, caps and umbrellas.

TECHNIQUE TRIAL IS NOT TO OCCUR

Clifford C. Hield Receives Summons But is Now Freed of Charge

INJUNCTION TAKEN OFF

Technique will be Published This Year as Formerly

An injunction against the publication of Technique, 1910, by some member of the junior class who felt that a story of detrimental character concerning him was to have place in the grind department, has been removed, and Technique will be published this year as formerly.

The members of Course II were greatly aroused some ten days ago when a summons to appear in the Massachusetts court of equity was served by a deputy sheriff on Clifford C. Hield, the grind editor of Technique. Hield was required to appear this morning at the court of equity in a hearing on the injunction on the accusation of L. B. Crist, attorney for the plaintiff.

Technique immediately retained as attorney Homer Albers, known to Institute juniors for his lectures on business law, and it looked as though the matter might come to formal trial. It was feared by some that even if the injunction against publication was not granted, Technique might be seriously delayed by a demand that certain parts of the grind department be eliminated.

The whole matter was satisfactorily settled, however, when the plaintiff yesterday withdrew the injunction. Accordingly, there will be no hearing on

Technique at the Court House this morning, and unless further complications arise, the annual will appear in Junior Week as originally planned.

BREYER IS PRESIDENT

Will Head Mining Engineers For The Coming Year

At the meeting of the Mining Engineering Society held last evening at the Union, the following officers were elected: President, R. S. Breyer 1910; vice-president and treasurer, B. S. Wohlge-muth 1910; secretary, J. L. McAllen 1911.

A. E. Burt 1909, spoke on mining in Cobalt, Ontario, and illustrated his talk with a number of samples of ore. He told in an interesting manner of how Technology men ran the mines during the strike. Mr. Burt said that students should not go out to work in mines with the idea that they know it all. The men who have been on the job for a long period of time are not likely to stand for that sort of an attitude.

The second speaker of the evening was Mr. Cansell, who has been at work in Southern British Columbia on the Canadian Geological Survey.

He showed some excellent views of the Cascade Mountains, and told of the very heavy ore deposits of Headly, B. C. He said that the mine here was one of the richest gold mines in Canada, and last year had an output of half a million dollars.

Dr. Robert S. Wood, president of the Carnegie Institution addressed the regular meeting of the Society of Arts last night. He described the foundation of the Institution by Andrew Carnegie, its organization and purposes and the various lines of investigation which are being pursued under its direction.
