ELECTION REVIEW OF MARSHALLS

Three Chief Marshals to be Elected on Second Ballot

ORDER PORTFOLIO NOW

Class Must Support Committee to Make Mullard in its Financial Successes

1909 held a class-meeting yesterday afternoon to consider the advisability of changing the manner of electing the class marshal. According to the plans, the twenty-five men receiving the highest number of votes would be marshals, and the next three highest men would be named as alternatives. This plan might be made feasible by a popular man, who was, perhaps, unfitted for the regular position, but who was very important as first of his class. The committee was authorized to be chosen from the marshals in a second ballot.

TRANSPORTATION PROBLEMS IN N. E.

J. A. Drogee Speaks at Civil Engineering Meeting Wednesday

TALKS ON FREIGHT

Conditions in England Similar to Those in the New England States

At a meeting of the Civil Engineering Society Wednesday, J. A. Drogee, superintendent of Providence Division N. Y., N. H. & H. R. R., spoke on the transportation in the New England States.

There are three essential features of importance to the service of freight, first, the cost; second, the dispatch of service, and third, the regularity and reliability of the service. The present difficulty in railway freight in which the volume and quality in which it is loaded or unloaded a car, reduces four dollars from its producing power. What ought to be done is to put the freight cars on a day rather than a mile basis. The demand for the transportation of stones and electric railroads, for instance, much needed by small farmers.

There has been a vast increase of imports and shipping without a corresponding increase in the number of railroad companies. The English are the only railroad company in England. In England, however, the average of freight in dollars is greater than in the United States. The English railroad company has an advantage in that it can make many small freight cars.

As an illustration of rapid and economic arrangements, note the railroads in England are not completed. This is an English institution that has been established for many years. There has been a general increase in the number of freight cars and miles, which is a natural growth of the population. The cost of railroad freight is the same in England as in the United States.

M.Mm.MN.ODScs SPEAKS CONSTRUCTION IN DETAIL BEFORE M. E. SOCIETY

Lecture Illustrated

Program Committee Appointed Several New Members Admitted To Membership

Wednesday night, Mr. Eames of the Heine Boiler Company spoke to the Mechanical Engineering Society on the new type of boiler design. The entire boiler is a real interest to the junior engineers, who have recently been studying boilers. Mr. Eames was given a real interest in the junior engineers, who have recently been studying boilers.

BASEBALL SEASON BEGINS TODAY

Sophomores Line up Against Volkman School in First Game

1912 PLAYS SATURDAY

Will Meet the Rochesterites From Roxbury in First Practice

Volkman School are to be the sophomores' first opponent in baseball. The two teams will line up against each other in the first game of the season. The varisty team has done little practice and only comparatively few men have played for the team, so that prospects for a victory are not likely.

Of the last year's men Capt. L. S. Roddick can put up a good game on the inside, and C. L. Rosland the former Rochester College captain has been showing good form. Behind the hit H. W. Darnell is to be the backfield. The team has a good one in the batting and will be strong, C. L. Rosland and H. W. Darnell being the only candidates and all three are likely looking men.

The fielding is a fine basis for the team, and it is in the pitcher's box that it is unsettled who will fill the position. S. Haley and L. B. Stevens are the only candidates, and although Darnell and MacLaughlin's arm in is poor condition, it is an unassailable claim, and although he is inexperience. Mr. Sedgwick has been signaling S. Haley, but he is not likely to play. Pref. P. H. Hull has dated tomorrow at Roxbury, and a very strong man at the bat. F. W. Civiir, L. J. Metcalf and L. Harrington are the only candidates and all three are likely looking men, Civiir played last year.

The circle is a good one for the team, the pitcher in the pincher's box and it is unsettled who will fill the position. S. Haley and L. B. Stevens are the only candidates, and although Darnell and MacLaughlin's arm in is poor condition, it is an unassailable claim, and although he is inexperience. Mr. Sedgwick has been signaling S. Haley, but he is not likely to play. Pref. P. H. Hull has dated tomorrow at Roxbury, and a very strong man at the bat. F. W. Civiir, L. J. Metcalf and L. Harrington are the only candidates and all three are likely looking men, Civiir played last year.
