ANNUAL SPRING MEET SATURDAY

Kneest of Compeition Expected In All of The Events

1910 EXPECTED TO WIN

Freshmen Will Make Good Fight For First Place However—1909 May Be Last

With indications of keen competition, there has been a big rush to the Tech meet, the spring games will come off at the Field on Saturday. The gift of three special cups has added greatly to the interest in the meet. The cup for the winner of the mile run was given by S. L. Rathehauer 1896, a former distance runner, to J. A. Rockwell given by the quarter mile trophy, holds a present Tech record of 51 1-5 seconds. It was made after coming a half mile in close to two minutes. Benjamin H. 1911, who presented the hurdle cup at one time held both hurdle records. These cups will be received each year so as to become permanent property of the winner of the individual cups, Major F. H. Briggs 1881, chairman of the athletic advisory board, has presented a cup to be kept in the Union and on it are to be engraved the names of the class winning the most points in the winter and spring class championship matches. The house will recognize to the junior class which has 35 points to its credit. The freshman meet next with 29-3-2, followed by the seniorty with 17-2-2 which will not be able to exceed 17.

It may be possible that the chance of winning one of the three cups will outweigh the class spirit of enough men to give the freshman meet on the juniors. This seems all the more likely on account of the strong distance men among the entering class who will show up well in the mile and two mile events.

Competition will be keen in all the track events. Capt. C. W. Gamma will make the strongest bid for the central and finishing distance, but will have to break the present record by Grant 1912, Reed 1912 and L. T. Taylor 1911, in the 100 and Salish Hall 1912, Ogilvie 1912 and White 1911 in the 200. The race in the quarter mile (1918) will be a fight from start to finish with the record of Grant 1894 but who has been running the distance almost too close together to allow a margin between them and a bunch of half milers who are going to make a bid for the cup. White looks best, with Rockwell next in the race.

With F. E. Williams 1911 in the quarter, the half mile should go to C. P. Eklund 1911, of the cross country team. A number of men who know they have no chance in the mile and the 440 will also be entered and who will have a very good line on the second string second place, these are P. E. Bell 1916, C. L. Tullar 1912, and W. O. Kenan 1912. Grant 1912 has taken the title, but Gamme has brought technology many points in cross country and indoor track. The record breaking distance is the mile, and most of the followers will get a chance to win one of the M. T. P. A. cups, or make one for the mile cup, and most of the followers will win the mile cup.

LARGEST COLLEGE REUNION

TEAMS IN GAMES

C. L. Tullar 1912, and White 1911. Manager will entertain on another stage. The score by innings: 1912, 12-0; 1911, 6-9. 2. Allen, C. L. Tullar 1912, and White 1911. Manager will entertain on another stage. The score by innings: 1911, 6-9; 1912, 12-0.

Largest College Reunion Ever Held in Massachussets ALUMNI ENTHUSIASMIC

Many Coming From Pacific Coast And Abroad to Attend—Three Day Program

That the great All-Technology Reunion of its kind ever to be held by any college reunion ever seen in Massachusetts is by far the most enthusiastic. The work of planning for the reunion began last March. The Executive committee, which has been organized since then, has completed in detail all the arrangements for various classes and associations, and that has been done with the utmost success. The reunion will be large, both in numbers and in the enthusiasm of the Techies present, and it will be a great success.

As the plans have been developed, the number of those who are coming has increased tremendously, and with the announcement of the event that the inauguration of President MacArthur will be held in connection with the meeting of the Council. It is expected that the reunion will be presented on the stage, or in the several activities that have been planned. It is expected that the most interesting special feature of the reunion will be the gathering of alumni from all parts of the world where Technology has made a resolution at that time that they would be on hand at the next reunion.

On Tuesday, Wednesday, and Thursday, the members of the Faculty and instructing officers will meet together, and those who are coming from the various classes, will enjoy-their own reunions. These clubs will entertain on another stage. The score by innings: 1911, 6-9; 1912, 12-0.
