

# THE TECH

VOL. XXVIII. No. 83

BOSTON, MASS., MONDAY, MAY 17, 1909

PRICE THREE CENTS

## THE TECH PLANNING TO START A DAILY

Large Field for Many New Developments Now Under Way

### MORE MEN WANTED

Many Opportunities for All Who Will Report Today at The Tech Office

Believing that the interest of the Institute and of the Institute activities will be best served by a daily newspaper, the Board of Editors of The Tech is seriously considering the advisability of changing from a triweekly to a daily next October.

### New Departures—College Notes.

The plans as so far discussed involve extensive changes and developments. A column of up-to-date college notes will be run, clipped from The Tech's file of exchanges. For this purpose the present exchange list, already long, will be still further enlarged. This department will be of particular interest to men from other colleges.

### Current Events

Current events in the world at large will be given fairly full treatment as gleaned from the leading and best weeklies, monthlies, and dailies. It is considered by the Board that this department run as in the Yale News and Cornell Sun will be of particular value to Institute men, as the pressure of work here is so great that many fellows do not have the time to pick from the newspapers, filled with lurid accounts of the latest robberies, murders, and assaults, the news that is really worth while.

### Undergraduate Activities.

All Technology news will be very fully covered, more than has been heretofore possible. Undergraduate activities will occupy the same important place that they have always had.

### Alumni and Institute News.

Arrangements are being perfected whereby alumni news will be reported frequently from all over the country. Here at the Institute news from the departments and professors will be wholly up-to-date. It is hoped to keep the men in the various courses well-informed concerning all departments, for very frequently fellows in the upper years are so engrossed in their own work and outside interests that they are almost entirely ignorant of the inside workings of the other departments.

### Constructive Criticism.

Editorially The Tech proposes to keep as heretofore an eye on all Technology events, and by constructive criticism to preserve and foster the traditions and activities of the Institute.

### Undergraduate Enterprises.

With the coming of the new Union has come also a boom in all undergraduate enterprises. The social life of the Institute, weak at best, is becoming rapidly stronger. The men are becoming more interested, as for instance in the enormous development of the Chess Club this year, and the founding of the Wireless Society. There are many men not yet reached, however, and one of the most important functions of a daily Tech will be to assist any present or new institutions in reaching just these men.

### New Opportunities on Staff.

The main and only requirement in bringing about this daily is a proportionate increase in the size of the staff. There will be a large number of opportunities for all men interested, especially men now here. These men have the advantage over next year's freshman class in that they know the Institute.

### Experience, Unnecessary.

It is believed that the fellows will find the work extremely interesting. Experience, and ability in writing English compositions are not the primary qualifications for this work. All that is necessary is interest, and willing-

## STEVENS ELECTED EDITOR-IN-CHIEF

Electoral Committee Makes Brookline Man Head of Technique

### MOORE BUSINESSMAN'GR

C. T. Morey First Assistant Business Manager—Competition for Grinds Started

After three weeks of heated discussion and debate, during which time a dozen or more ballots have been taken, the 1911 Technique Electoral Committee elected Donald Read Stevens, of Brookline, Mass., editor-in-chief of Technique 1911. The contest for the position has waxed warm, Lloyd Cartwright Cooley, also of Brookline, being runner-up.

During the last of Stevens' four years at Brookline High School he was editor-in-chief of the Sagamore, which paper ranks highly among the high school papers of New England. It is a matter of record that the Sagamore under Stevens enjoyed one of its best years in its long career.

Since entering the Institute Stevens has been most prominent in school and class affairs. As a freshman he was a member of the fast 1911 relay team; a chorus man in "Over the Garden Wall," a member of the mandolin club, afterward becoming manager; a member of the news staff of the Tech; and he wrote the 1911 class history for Technique 1909. During his sophomore year Stevens was elected to the Institute committee by the class; became an associate editor of the Tech; member of the 1911 basketball team; and a member of the 1911 baseball team.

The business manager of this year's book, Francis Aldrich Moore, of Tyler, Texas, after a four year course at Austin college, Texas, where he received his degree of B.S., entered the Institute as a member of the sophomore class in Electrical engineering.

As a senior at Austin college, Moore was the business manager of the college annual there. He established a reputation by bringing the book through the most successful year of its career with a clear profit of several hundred dollars. In former years the book had always finished the year with a considerable deficit.

Moore has already started a competition for three business assistants. According to the constitution of the 1911 committee, two assistants are to be elected by the committee, and three additional ones to be chosen later by competition.

At Friday's meeting of the committee, Chester Totten Morey, of Cambridge, Mass., was elected to the position of first assistant business manager. Morey has had considerable business experience, having been in business for two years before entering the Institute.

A competition for grinds for the 1911 book has been started by O. B. Denison, grind editor. A prize of \$5 will be awarded for the best collection of grinds, while a second prize of \$2.50 is also offered.

ness to put in a little time once a week. Benefits to Participants.

The benefit to men taking part will be experience in dealing with other men, the formation of friendships and acquaintances, relaxation from the strain of constant studying, knowledge of the Institute as few not connected with some activity, especially The Tech, can attain, and a general broadening of the mind and development of the character. A man after graduating will look back on his undergraduate life with far more pleasure if he has taken part in some activity and of all those in which he can take part. The Tech offers as attractive inducements as any.

## P. D. WHITE THE STAR PERFORMER

Capt. Gram Though Injured and Watkins Also Shine

### ENCOURAGING WORK

Our Chances in the Intercollegiate Are Now Very Much Improved

Coach Kanaly held a handicap meet Saturday to pick from the six men entered in the Intercollegiate, the four who will start in each event. The first four men to finish in each event will compete in the big meet on Saturday. There were some exceedingly good performances. P. D. White 1911, was the individual star with firsts in the half mile and the 220 yard dash. Capt. Gram strained a muscle when he left the mark in the furlong dash, but with careful nursing should come around all right by Friday, when the trials will be run.

The summary follows:

100 yard dash—Won by J. S. Grant 1912, 2 yards; second, S. E. Reed 1912, 3 yards; third, W. J. Seligman 1911, scratch; fourth, C. R. Johnson 1911, 6 yards. Time, 10 4-5 seconds.

220 yard dash—Won by P. D. White 1911, 8 yards; second, W. J. Seligman 1911, 7 yards; third, G. B. Cumings 1910, 9 yards; fourth, C. R. Johnson 1911, 11 yards. Time, 23 1-5 seconds.

440 yard dash—Won by C. W. Gram 1909, scratch; second, M. A. Oettinger 1912, 10 yards; third, J. I. Murray 1912, 12 yards; fourth, C. R. Johnson 1911, 20 yards. Time, 53 seconds.

880 yard run—Won by P. D. White 1911, scratch; second, W. S. Davis 1910, 18 yards; third, H. Lockett 1910, 20 yards; fourth, E. M. Potter 1910, 15 yards. Time, 2 minutes 6 2-5 seconds.

One mile run—Won by H. S. Watkins 1912, scratch; second, R. D. Van Alstine 1911, 30 yards; third, K. Cartwright 1912, 45 yards. Time, 4 minutes, 44 1-5 seconds.

Two mile run—Won by H. H. Howland 1909, scratch; second, J. N. Stephenson 1909, 55 yards; third, J. F. McCarthy 1909, 35 yards; fourth, C. H. Morrill 1912, 60 yards. Time, 10 minutes, 19 seconds.

220 yard hurdles—Won by R. H. Allen 1909, 12 yards; second, J. S. Grant 1912, 10 yards; third, G. B. Cumings 1910, scratch; fourth, A. B. Mason 1910, scratch. Time, 27 1-5 seconds.

120 yard hurdles—Won by A. B. Mason 1910, scratch; second, H. S. Gott 1910, 10 yards. Time, 17 seconds.

High jump—Won by P. W. Daltymple 1912, 2 inches; second, B. Jones 1910, 7 inches; third, R. H. Allen 1908, 3 inches; fourth, E. Stuart 1910, scratch. Height, 5 feet 8 inches.

Broad jump—Won by H. Greenleaf 1912, 2 inches; second, J. Becker 1912, 1 inch; third, R. Allen 1909, 5 inches; fourth, R. H. Gould 1911, scratch. Distance, 19 feet 4 inches.

Shot put—Won by J. Becker 1912, 5 feet; second, D. F. Benbow 1912, 2 feet 6 inches; third, O. V. Chamberlain 1910, scratch; fourth, D. V. Williamson 1910, 5 feet 10 inches. Distance, 42 feet 2 inches.

Hammer throw—Won by W. M. Ruby 1912, 24 feet; second, L. G. Metcalf 1911, scratch; third, J. L. Bray 1912, 20 feet 6 inches; fourth, R. H. Scanlon 1912, 35 feet. Distance, 114 feet 3 inches.

Discus throw—Won by D. F. Benbow 1912, 16 feet; second, E. Stuart 1910, 7 feet; third, W. M. Ruby 1912, 15 feet; fourth, L. D. Nisbet 1909, scratch. Distance, 109 feet.

Pole vault—Won by E. Mangan 1912, 20 inches; second, W. D. Allen 1911, scratch; third, H. Greenleaf 1912, 16 inches; fourth, H. S. Gott 1910, 22 inches. Height, 10 feet 11 inches.

## MASS MEETING TO AROUSE INTEREST

Coach Kanaly Picks Tech For Third Place in Meet

### DR. ROCKWELL SPEAKS

Example Set by the Freshmen and Other Small Colleges Is a Good One

About 150 students gathered in the Union last Friday noon to arouse some interest in the coming Intercollegiate meet. Capt. Gram introduced first Coach Kanaly, who spoke of the lack of spirit that was prevalent here at Tech. He said that in many other and smaller colleges a man would be greatly encouraged by any interest manifested by the fellows in his track work and if he had any ability and did not come out, the students would see to it that he was escorted out to the track after his recitations. Tech is larger than any other of the competing colleges and yet has won but one Intercollegiate meet. In concluding he expressed the hope that this meeting would be followed by many others early next year to act as an incentive to the men to come out at the beginning of the season. It was the fine spirit that enabled the freshman class to take second place in the inter-class games.

Dr. J. Arnold Rockwell 1896, who holds the Institute record in the quarter and who is the donor of the cup given for that distance this year was the other speaker. He is a fine example of the hale physique of man approaching middle life, who has been an enthusiastic athlete in his youth. He told of the victory track team back in 1894, and the accidents that caused their defeat the following season. Dr. Rockwell said that the work at Tech was just as hard 15 years ago as it is now, and that the excuse of too much work will not go down, because a fellow can easily spare the few hours a week necessary to keep in good condition. In fact, the time thus spent does not interfere with scholarship, but actually increases a man's ability to study.

Dr. Rockwell said he was ashamed of the small number of men who competed in the meet last week, and especially of the fact that some of the men who ran well were out for the first time. "This is disgraceful," he said, "You do not pass 'Applied' without working and working hard, and even then you may not get through. Neither can you become a good athlete without working and you have to work a long time before you are good, but you will be in better condition and it will help the team. You have an excellent equipment and as good a coach as there is. Everything you need is provided for you except your enthusiasm and it is up to you to get busy."

Dr. Rockwell took this occasion to give the fellows an idea of the loyalty, enthusiasm and sympathetic interest of Major Briggs in the men and athletics at the Institute. He said that the Major is often misunderstood, but is one of the whitest men he ever knew and is always ready to help to the extreme limit of his ability.

### BALL GAME POSTPONED

Owing to the inability of several of the 1911 team to be at the Field Friday, Captains Trufsmith and Foster of the rival teams called off the second game of the 1911-1912 series. The game will in all probability be played some time this week.
