All communications regarding advertisements should be addressed to the Business Manager. Regarding subscriptions address the Circulation Manager.

Subscriptions within the Boston Postal District and outside of United States must be accompanied by postage at the rate of one cent for each copy.

Subscription - - - \$1.50 per year in advance.
Single Copies 3 Cents.

Printed by Old Colony Press, Boston.

Monday, May 17, 1909

The Tech calls particular attention to the article in another column describing the plans for a daily. The scheme has already been pretty fully discussed and appears to be more than feasible. The only requirements that remain to be filled is the large number of candidates for the news business and circulation staff. Experience has shown other men that the work is beneficial and interesting. Come around to the meeting today and find out for yourself.

To Advertisers in General

A SPECIAL ISSUE AND A GOOD ONE AT THAT!

The Tech plans to publish the largest issue that it has ever had on June 7, the opening day of the Grand All-Technology Reunion. This issue will reach the foremost engineers of the world, who will be in Boston for the Reunion.

This issue should be of special value for advertisers on this account. Already a large number of well known concerns have reserved space. Your application will not be late if sent now.

For particulars address the Business Manager, 42 Trinity Place, Boston, Mass.

be spread upon the records of the class of 1912.

(For the class of 1912.)

CIVIL SUMMER SCHOOL

The summer course in Topographic and Geodetic Surveying and Hydraulic Measurements, given in alternate years, will be held this year at Rangeley, Maine.

The work will consist of a topographic survey of an extended area on the shore of Rangeley Lake, using the plane table, together with the necessary base-line measurement and triangulation; a stadia survey of Rangeley Village; the use of the sextant and sounding line in contouring a part of the bottom of the lake, and the measurement of the flow of one of the nearby streams. Mercury and aneroid barometers will be used to determine the heights of some of the neighboring hills and mountains. Practice will be given in the use of the heliotrope in signalling between distant stations and in triangulation. Astronomical observations will be taken to determine latitude, time and azimuth.

The school is open to students who have satisfactorily completed the second year in the departments of Civil and Sanitary Engineering and to properly qualified students in other departments. The tuition is \$25, payable in advance.

The party will leave Boston immediately after the annual examinations, and return on Saturday, July 3.

Students intending to attend will please notify Prof. Robbins not later than Monday, May 17.

A gloom has been cast over the Institute by the death of our schoolmate, Arthur Edward Joyner. Studious and unassuming, he won the respect of all with whom he came in contact. On behalf of the students of the Institute, The Tech joins the class of 1912 in expressing its sympathy to his parents in their bereavement.

ARTHUR EDWARD JOYNER

Last Saturday morning at about half past nine, Arthur E. Joyner 1912, was taken sick in mathematics class and died shortly after in Union, where he had been carried by his class mates. Death was caused by acute hemorrhage. Since entering the Institute Joyner has followed Course III, and all those

who knew him speak very highly of him. His home was in Miami, Florida.

The following resolutions have been adopted by the class of 1912:

Whereas, God in his infinite wisdom, has taken from us our beloved classmate, Arthur Edward Joyner, and

Whereas, the class of 1912 of the Massachusetts Institute of Technology has lost by his death a member whose quiet personality and sterling character won the respect and friendship of all those about him, be it therefore,

Resolved, that we, the members of the class of 1912, extend our deepest sympathy to his loving family in this time of bereavement, and be it further

Resolved, that a copy of these resolutions be sent to his family, that they be published in the Tech, and that they
