Will Give New Men a Chance to Meet Each Other

Tonight at eight 'o'clock the Technology, J. M. C. A. will hold an informal reception for the new men, who have entered the Institute this fall. The affair is not given in any sense as an entertainment. It is a means of promoting the acquaintance of new members with the J. M. C. A., but solely to promote the acquaintance of new members with the old students of the school. No refreshments shall be served, as this will detract from the informal character of the affair.

The entertainment will consist of addresses by various prominent members of the faculty and students of the Institute, followed by music and dancing. Altogether it will be a very enjoyable evening, and will warrant the trouble of coming.

Among those who will address the gathering are: Prof. Maximus, Cortland Jones, J. M. C. A. band director, Erastus Clapp 1910, editor of the Institute, and E. C. Worman of the Y. M. C. A., Don-ald J. Nevan 1911, editor-in-chief of Technology, and Eugene Morgan, editor of The Toil; and Dudley Chapp 1910, the general manager of the Toil.

As will readily be seen from the above, the invitation is very cordial, and every man who wishes to gain the acquaintance of the old students is invited to attend.

SHOW PROSPECTS GOOD

Many Men Working on Books

Several books for Tech show 1911, are being prepared by undergraduates, and a number of the classes have had their books in print. The number will be entered in the compiti-

tion, which closes on the first of No-

vember. On or before that date the

instructor, which will be held on October 3, will be set up.

The committee has little money left over from last year's funds, but the proceeds of the sales of tobacco and candy at the games, will be used to further the plans of the Entertain-

ment Committee, which will be going into the funds of the dining room.

NO DRILL TODAY

One Hour Drills Begin On Next Wednesday

This year for the first time, the hours of drills will be cut from three to two. The men of each class will be drilled on one day, and Appendix B will drill on Monday, from 8 until 9. Appendix C and D on Friday at the same hour, while all four companies will meet to drill Wednesday, from 2 until 3.

For the purpose of the change is to make more room in order that the instruction for drill will fall on three days instead of two.

The drill on Wednesday week was attended by lieut-autorized with the University of Pennsylvania on October 22, when President Benjamin will inaug-

urate the series with an informal talk. It is expected to arrive in Boston today so as to make up the balance of his two-weeks' tour.

Prof. Wiekendon, although a young man, has established a remarkable rep-

utation in the educational and profes-

sional world, and the Wisconsin Uni-

versity made every effort to retain him (graduating from Denver University) in the class of '99, he received a B. A. degree for a course in which philosophy and mathematics played the leading role. For a couple of years he was in the Rochester Institute, N. Y., Al-

ternate night school, returning to the study of physics as a graduate student at the University of Wisconsin, where he received a master's degree.

He was appointed assistant in physics at Wisconsin in 1900, and for the past two years has been on the staff of the Institute of Technology, teaching physics, in addition to being assistant in electricity, light, and heat in the Institute courses.

Prof. Wiekendon has devoted consid-

erable time to research work, prim-

arily in physics. He is the author of an extensive treatise on photometry and illumination, which is at present in print. His publications as a magnetic and electrical physicist have had him placed in the forefront of his profession, and faculty alike at Wisconsin.

The new professor has been married a year and has a small child.

PROF. PENDER TO WRITE BOOK

Professor Harold Pender of the depart-

ment of electrical engineering has decided to write a text book dealing with the more advanced lines after considering the matter for some time. He will commence work on the treatise this fall, but does not expect to give it to the public in less than two years.

The book will take up the discussion of design and con-

struction, and will be approximately 500 pages in length.

The book, when completed, will fill an entirely unique space in the ranks of professional literature, as the only pre-

vious work on the subject is very incom-

plete and antiquated. As a text book and reference volume for practising and professional engineers, the book will be eagerly awaited.

BROTHERRIETH LECTURES

Series of Lectures to Students by Trinity Rector

At the first meeting of the Brother-

hood of St. Andrew this year, held last Tuesday evening, the following series of lectures was given out. These lectures will be given from 7:00 to 9:00 on the stated dates, in Trinity University, and will deal with life and character.

A SERIES OF DIALOGUES LED BY DR. MANN ON "FAITH AND LIFE."

Fatherhood of God—What We Believe Do You Know the Truth

(Continued on page 2.)

Varsity track athletes have been

vividly described in the press of Oregon, and in that time played on foot ball teams, was his manage-

ment, and he is also a member of the track team for two years. It is expected that he will enter the "sharks" and handle events here. L. C. Bruley 1908, who was at one time a mem-

ber of the track team, last year, had his bad form, and was very fast, especially in the cross-country and relay events. He is at the time a member of the track team.

On the whole, yesterday, the practice season opened with enthusiasm. Dr. Heer, in his address to the team, spoke highly of the athletes having reported for varsity practice, as a good atmosphere for an ap-

pearance. L. B. Bulk, H. W. Hage-

en, A. G. Thompson, E. Montgomery, and H. M. Heene of the Electrical Engineering Department, were also present.

The preliminary trials for the football team were held last week, the final trials October 23, and the first trials October 26. The members of the team were selected by the field manager, S. W. Walsh, who was at the Lewis Institute.

In the preliminary trials 89 men were expected to make the team, but only 91 were selected, being at the Lewis Institute. Of the other 80 the majority were from the school, and a few from outside institutions.

Captain Elmer 1912, magn a magn, said that all of last year's team and any other men of any experience or worth report, as the small number makes the out game very difficult. The tests were at trying if at all possible to form a team,

The football team for 1911, which was decided on by the Brotherhood of St. Andrew this year, was given out last Tuesday evening. These lectures will be given from 7:00 to 9:00, on the stated dates, in Trinity University, and will deal with life and character.
