PRICE ONE CENT

Y. M. C. A. RECEPTION TONIGHT AT 8 Will Give New Men a Chance to Meet Each Other

Tonight at eight o'clock the Technology Y. M. C. A. will hold their annual reception for the benefit of the new men who have entered the Institute this fall. The affair is not given in any sense as an advertisement to gain members for the Y. M. C. A., but rather to promote the spirit of good-fellowship in the school. No freshman should miss this opportunity to meet his fellow classmates in a social way.

The entertainment will consist of addresses by various prominent members of the faculty and students of the Institute, followed by music and singing. Altogether it will be a very enjoyable evening and well worth the trouble of coming.

Among those who will address the gathering are Pres. Maclaurin, Gorton James 1910, the Chairman of the Entertainment Committee of the Union, Mr. E. C. Worman of the Y. M. C. A., Donald H. Stevens 1911, editor-in-chief of Technique; R. H. Ranger 1911, managing editor of The Tech; and Dudley Clapp 1910, the general manager of the Tech Show.

As will be readily seen from the above programme, the new men present should gain, from the addresses given, an insight into the various social and literary activities of the Institute which will show them that Technology stands for much more than study.

SHOW PROSPECTS GOOD

Many Men Working on Books

Several books for Tech Show 1910, are being prepared by undergraduates, and the indications are that a large number will be entered in the competition, which closes on the first of November. On or before that date the books should be handed in at the Cage, for Kenneth Greenleaf, Stage Manager, bearing only the assigned number; the author's name to appear nowhere. His name should be placed in the numbered envelope, procured at the Cage, carefully sealed, and handed in with the book.

In former years, the belief has been prevalent that unless a man could write a complete libretto there was no use in entering the competition at all. This, however, is not the case at all. Anyone having a scenario or an act that he thinks is good, should consult with the coach as soon as possible, but by all means before October 20, as in the final choice only complete books will be considered by the judges.

There are a few of the third edition of the score of last year's Show, "Over The Garden Wall," still left which are on sale at the Cage, and also of the scores of former Shows. The supply of last year's scores is very limited, and another edition will not be issued, so this is the last chance there will be to procure them. Posters and postals of the poster and principals may also be procured at the same place.

Considerable controversy has arisen at Brown University over the time of rushing and pledging men for the various fraternities. Five of the fraternities are arrayed against the rest.

The Pennsylvania Dental School has been formally united with the University of Pennsylvania.

UNION ENTERTAINMENTS TO BE CONTINUED Interesting Course of Friday Night Talks Arranged

Friday night entertainments at the Union, which proved so successful last year, will be resumed on October 22, when President Maclaurin will inaugurate the series with an informal talk.

Friday evening entertainments were started last year in the new Union with the undergraduates, and the attendance demonstrated their popularity.

Maurice R. Scharff 1909, assistant to President Maclaurin is in charge of the Union, and all matters connected with it, while Gorton James 1910, is chairman of the Entertainment Committee.

During the past summer, Mr. James has been busy making arrangements for an interesting series of events.

Lectures by well known men, interspersed with affairs of a more purely entertaining character, like Hook-Night, and joint affairs with other colleges have been arranged for.

Mr. James wishes it understood, however, that no purely technical and engineering subjects directly connected with the Institute courses will be discussed, the aim being to provide discussions of a broadening character. Outside topics more familiar to the students as aeronautic, municipal and national questions and the like will be taken up.

The committee has little money left over from last year's funds, but the proceeds of the sales of tobacco and candy at the Cage, will now be used to further the plans of the Entertainment Committee instead of going into the funds of the dining room.

NO DRILL TODAY

One Hour Drills Begin On Next Wednesday

This year for the first time, the hours for drill will fall on three days instead of on one. Companies A and B will drill on Monday, from 3 until 4, Companies C and D on Friday at the same hour, while all four companies will meet to drill Wednesday, from 2 until 3.

The purpose of the change is to make more room in order that the instruction may be more efficient. The change has made it difficult for the officers of the battalion, who are for the most part sophomores, to arrange their schedules, and therefore the appointments have not yet been finally arranged. They will be announced early next week.

As the drills for Friday and Monday, October 1 and 4 respectively, will be omitted, the first drill of the year will be held at the armory on Wednesday, October 6th. The large number of men who have had previous training in drill will then be placed under their respective officers and will be given command of squads immediately.

All the men taking military science will be expected to have purchased their suits and to appear in them at drill after October 20th.

"Stand to your work and be wise;
Certain of word and pen,
For we are neither children nor gods
But men in a world of men."—Cornell Daily Sun.

The sophomores were victorious in the first football rush ever held at Trinity, the rush being the feature of "Bloody Monday," this year.

NEW PROFESSOR IN ELECTRICAL ENGINEERING W. E. Wickendon Appointed to Fill Vacancy

W. E. Wickendon of the University of Wisconsin has been appointed assistant professor of electrical engineering, to succeed Associate-Professor G. E. Shaad, lately resigned to accept the chair of the electrical department of the University of Kansas. He is expected to arrive in Boston today or tomorrow to take up the duties of his new post.

Prof. Wickendon, although a young man, has established a remarkable reputation in the educational and professional world, and the Wisconsin University made every effort to retain him. Graduating from Dennison University in Ohio, with the class of '02, he received a B. S. degree for a course in which physics and mathematics played the leading role. For a couple of years he taught in the Rochester, N. Y. Atheneum night school, returning to the study of physics as a graduate student at the University of Wisconsin, where he received a master's degree.

He was appointed assistant in physics at Wisconsin in 1905, and for the past two years has been on the staff of instruction in the electrical engineering department, reaching the grade of senior instructor.

Prof. Wickendon has devoted considerable time to research work, principally physics. He is the author of an extensive treatise on photometry and illumination, which is at present in print. His qualities as a magnetic teacher made him popular with students and faculty alike at Wisconsin. The new professor has been married a year and has a small child.

PROF. PENDER TO WRITE BOOK

Professor Harold Pender of the department of electrical engineering has decided to write a book on transmission lines after considering the matter for some time. He will commence work on the treatise this fall, but does not expect to give it to the public in less than two years. The work will take up the discussion of design and construction, and will be approximately 250 pages in length.

The book, when completed, will fill an entirely unique space in the ranks of professional literature, as the only present work on the subject is very incomplete and antiquated. As a text book and reference volume for practising and consulting engineers, the book will be eagerly awaited.

BROTHERHOOD LECTURES

Series of Lectures to Students by Trinity Rector

At the first meeting of the Brotherhood of St. Andrew this year, held last night, the following program of subjects was given out. These lectures will be given from 7:30 to 8:15, on the stated dates, in Trinity Church Parish House.

A SERIES OF DISCUSSIONS LED BY
DR. MANN ON "FAITH AND LIFE."

First Term Subjects—"Faith."

Fatherhood of God—Why We Believe It.

(Continued on page 3.)

MEN NOW WORKING AT FIELD AND OVAL Varsity Track Team and Class Teams Now Out

Varsity track athletics have brought out many old men and a few new ones. Among the new comers is R. B. McEwen, who has registered as a third year special. He has been a student for two years at the University of Oregon, and in that time played on the football team, was its manager, managed his class track team and ran on the varsity track team for two years. It is expected that he will enter the dashes and hurdle events here. L. O. Mills 1910, who was at one time captain of the cross-country team, has also reported. His work of last year was very fast, especially in the cross-country and relay events, he being at that time a member of the record-breaking relay team. W. D. Allen 1911, the holder of the Technology pole vault record has also come out to win more honors for the Institute. Of the other men, most are wearers of class insignia and some of the "T." those reporting being, Benson 1912, K. Cartwright 1912, Dolke 1911, Dalrymple 1912, Salisbury 1911, P. D. White 1911 and R. O. Wood 1911.

On the oval yesterday, the practice of the 1912 football team was carried on with spirit. Nevertheless, as only about a dozen men reported for practice, Captain Kieher 1912, urges strongly that all of last year's team and any other men of any experience or weight report, as the small number makes the selection of another winning team very difficult. The men were tried at falling on and picking up the ball, and the backs and line had individual coaching.

Meanwhile at the Field, the 1912 relay team had its practice. The men of last year's team were but few, some of the others having reported for varsity practise. The men putting in an appearance were: L. B. Duke, H. S. Benson, A. G. Thompson, E. Montgomery, H. Greenleaf, M. A. Oettinger and Mangan. The preliminary trials for places on the team will be held October 21, the final trials October 29.

Freshmen football practice at the Field, under Manager A. S. Wahl 1913, was brisk. Wahl, while at the Lewis Institute, Chicago, played left half-back on the football team, and also on some local basket-ball teams. G. W. Weymouth of the Friends Academy, Long Island, has played on his football team and was president of the senior class there. Coach T. H. Matten, Jr., who spent three years at University of Nebraska, and played tackle there, finds encouraging material in those reporting. However, as in the other class teams lack of men makes selection hard, and any man who has even meager ability is urged to report. Those reporting today were: E. H. Gage, H. F. Merrill, 2nd; B. B. Tremere, Jr., G. P. Capen, L. R. Block, R. S. Martin, R. W. Weeks, L. C. Gustin, G. W. Weymouth and J. Bernhard.

Relay practice for 1912, brought out seven men, among whom were Manager H. B. Horner of Melrose High, where he was class treasurer and a football man; F. C. Balke, formerly of the Indianapolis Manual Training School team; and Foley, who ran at Palmer High. For the twelve places on the relay team, the preliminary trials will be held on October 18. At this time enough men will be picked to supply substitutes for any man, who may be unable to run. On October 30th, six days before Field Day, the final trials will be run and the decision made as to which men will run and in what order.
