TENNIS ENTRIES

The following entries have been received for the fall tennis tournament: Little, J. O. Greeman, Atwater, R. T. Haslam, S. S. Lawton, Perkins, Flamberg, Stone, Sweet, T. B. Parker, P. M. Wentworth, F. M. Covill, Harkness, C. P. Kerr, Rankin, K. Dey, C. B. Rowley, O. C. F. Meisel, D. V. Williamson, H. H. Whithed, F. Russel, D. Stewart, O. Green, Schmiedekc, A. J. Freedman, G. M. Keith, N. McL. Sage and R. R. Runels.

C. E. SOCIETY

(Continued from page 1.)

Professor Allen told of the different points of view at which he met the men, in lecture, drawing, at field work and in the annual baseball game. Of the alumni, the zeal and enthusiasm of Mr. Fay and Prof. Spofford were to be taken as good indications. Great enthusiasm is a fine asset.

Professor Porter, after a number of anecdotes, proposed a new scheme of excursions, that is, that gangs of three or four could get much benefit in visiting engineering work about the city. Following him Professor Breed was called upon and spoke on his ideas of excursions, and the great advantage of watching and taking notes on the elementary practices of engineering.

The general trend of the evening was to urge men to find interests outside their work and to make the society an increasing success.

SOPHOMORE BASEBALL CAPTAIN ELECTED

J. I. Taylor 1912, has been elected captain of the sophomore baseball team. He was one of the 1912 representatives on the Athletic Association, was on his class relay team last year, and is a very good tennis player.

COURSE II NOTES

A new foundry course is being given this year to replace that formerly given to second year students in Course II. This course was optional, but the present course is now required in the fourth year.

As Mr. Merrick has retired under the Carnegie Foundation, his vacancy has been filled by a new man, Mr. Jeremiah O'Neil.

Mr. O'Neil is a graduate of the Mechanic Arts High School, and is considered a good teacher. At one of the large private schools of New England, where he taught last year, he is said to have displayed a great deal of energy.

In various departments at the Mechanical Laboratories, other changes have been made. In the engine room, a generator has been installed, and this will supply the electrical power for these buildings and save money for the Institute, as the gas formerly used for lighting had to be purchased. Incandescent lights have been placed over each lathe in the wood-working shop, and in many parts of the machine shop.

In the machine shop a few new machines have been added, and the usual painting and cleaning has been done in the summer.

The 500 k.w., 2300 volt alternating current generator has arrived from the Westinghouse Co. The water brake used in connection with the turbine in the old Pierce lunch room was removed yesterday afternoon, and work was begun in preparing the base for this generator.

BROOKLINE H. S. CLUB WILL MEET TO-NIGHT

The next meeting of the Brookline High School Club will be held this evening at the home of Alfred F. Kenrick 1912, 26 Bowker street, Brookline.

The principal business of the meeting will consist in the election of new members and in the discussion of a plan for splitting the club into two sections; one section for juniors and seniors, the other for sophomores and freshmen. The reason for the proposed change is that the membership of the club has become so large that it is impossible to hold further meetings at the homes of members. The two sections would usually meet separately, but several joint meetings would be held during the year.

D. V. Williamson 1910, will discuss the advantages of affiliation with the Brookline High School Alumni Association. A program of professional talks will be arranged, and W. J. Seligman 1911, will read the log of the last banquet. The club's log is a farcial account of meetings, written in turn by the members, and as Mr. Seligman is well known as a humorist, much enjoyment from his performance is expected.

WIRELESS SOCIETY MAKES PLANS FOR SEASON

Thanks largely to the efforts of E. B. Moore 1912 and E. H. Guilford 1912, the Wireless Society is now in flourishing condition, counting over sixty students among its members.

At yesterday's meeting, plans for the erection of a wireless station were fully discussed and a committee was appointed to confer with the faculty, and take the necessary steps to hasten the installation of apparatus. The members of the faculty have expressed themselves in favor of the plans of the society, and Prof. Cross has not only offered his help, but has also expressed his willingness to lecture before the society.
