NOVEMBER TWENTIETH

Relieves Major Wheeler As Head
Of Military Science Department

Author Of Show Book For 1910
Will Be Announced
At Dinner

H. S. Benson Elected Assistant Manager By T. A. A.

At a meeting of the Technology Athletic Association yesterday, Harvey Smith Benson 1912, was elected assistant manager of the track team. Benson was Athletic Association Representative for his first year and manager of the 1911 relay team. He is a member of the two mile relay team and bare and longjump.

P. J. Pershing 1911, has been employed by the Athletic Association to issue a call for candidates for assistant track manager.

Before the conference of the State Board of Health this afternoon to discuss the question of the opening of the baseball season and pointing to the school as the best condition of the public school, industries and agriculture, with their accompanying experiment work, has not been simulated by scientific means to a sufficient extent. Through practical teaching in the schools, the home will be made to feel the importance of the habits necessary for safe living and the enjoyment of daily life.

November twelfth has been decided upon as the date for the annual Tech Show Dinner, by far the largest dinner of the year given at the Union. The idea of giving a Runners dinner to all the undergraduate body, and especially to the freshmen, originated four years ago and has steadily increased in popularity every since. All who attended last year will need no special urging to be present again. It is primarily the freshmen who should make an effort to be present at this dinner given under the auspices of the largest student organization at the Institute. He will be able to find out just what the show is, the objects and province of all the different departments, and will also spend a most enjoyable evening.

For the Sophomore men there is the pleasure of matching each meeting again for the first time this year as Show members, and of hearing some of the songs from previous Shows. Mr. James France and Mr. Packard 90, are the leaders of the music. The songs have been selected to suit the purpose of the occasion, and the committee in charge.

The speaker of the evening was Mr. Loc, 1912. Mr. Loc has had many interesting experiences in the mining world since leaving the Institute, among these, was his service with the West End Winter. He gave a "non-technical" talk about the various mining localities that he visited during that western trip. He laid out to the members of the society many problems that they undoubtedly will have to face in their professional work. He stated that a mining engineer should be a miner, a geologist to locate the ore, and a draftsman to determine the value of a metal, a chemist to examine a sample, a surveyor to lay out a mine or claim, a draughtsman to draw up plans for building, an architect to properly construct and place machinery, an agricultural engineer to take advantage of any water power, a sanitary engineer to properly conduct and plan sanitation. The mining engineer should study the National and State laws regarding control of lands, should know the elements of soil science, should be good swimmers and handlers of boats, should know how to handle men, and above all things else, how to handle men.

CALENDAR.

Thursday, October 28.
1:00 P. M. - Club Meeting. 33 Rogers.
4:15 P. M. - Mandolin Club Rehearsal, Union Bar.
4:15 P. M. - Banjo Club Rehearsal, 33 Rogers.
