TUG-OF-WAR TEAMS TO BE PICKED SOON

Testing Machine Being Used to Determine Strength of Each Team

Great interest is now being shown at the Oval and the Gym. Both tug-of-war teams are being picked and every man on the two squads is doing his best. The teams will probably be announced in Wednesday's Tech.

Professor Park's testing machine has been set up behind the Gym. This device is based on the Thompson machine and the technologists are working on the principles of the machine. The freshmen have a trial on Saturday, and the weights of the team will be announced in the Tech shortly.

THE ONLY MACHINE.

The machine is designed to test the relative weights of the teams. It has been set up behind the Gym and the technologists are working on the machine. They are planning to have it ready for the teams next Monday. The machine will be used to test the relative weights of the teams. The results will be announced in the Tech.
