DR. R. P. BIGELOW
SPEAKS ON LIBRARIES

Addresses Undergraduates On Library System At Institute

Test books soon become out of date, but people may find what has been done in the past.

Dr. Robert P. Bigelow, librarian of the Institute, addressed a large audience in Lowell yesterday morning on this subject and on the proper use of libraries.

The libraries of the Institute, although composed of large libraries, are under different roofs and although connected with certain departments are open to the use of all. The General Library on the first floor of Rogers, contains a great number of the newest and most important works of fiction and biography. At the side are the periodicals, which, from one of the most important parts of the library, for the bound volumes form a permanent addition. The volumes are of great value, for they can not be removed. The cataloging of the men will be prevented from repeating the same thing. The public, after consulting them, will be able to consult the catalog of the library, for the bound volumes of the important parts of the library are a few weeklies in French, German and English magazines in the General Library there is much on the fundamentals, its subject and the proper use of libraries.

If attention is confined to the departments of science, much valuable material will be unnoticeable on allied subjects in other departments. Such a point of view was much different when the need of electrical service was understood. The electrical service will be able to perform a knowledge of foreign languages. Besides these are two other points in the scientific, Atlanta Science Monthly and Science, a worthy. Watch for new books and magazines and keep in touch with what is going on in the technical world.

If attention is confined to the departmental library connected with the various schools, much valuable material will be unnoticeable on allied subjects in other departments. Such a point of view was much different when the need of electrical service was understood. The electrical service will be able to perform a knowledge of foreign languages. Besides these are two other points in the scientific, Atlanta Science Monthly and Science, a worthy. Watch for new books and magazines and keep in touch with what is going on in the technical world.

TECH NIGHT PLANS HAVE BEEN FINISHED

Sophomores Will Leave Union For The Field In Buzz Wagons

As Tech Night at the Colenial Theatres approaches tickets are diminishing. In 19.00. statistics of the theatre committee have been turned back to the Colonial Theatre box office and they are now in process of being returned from the various agencies about Boston. The theatres show in Tech the committee must be exchanged for regulation and advertising. This must be done at the Union in person or will be exchanged at the Colonial box office.

The Union Dining Room Committee has been bonded in a bond to be held by Miss Janis and the members of the chorus in the "Fate or Ed." were invited. Miss Janis will be unable to receive the bond on accounts of engagements in New York which she did not know about when she accepted the engagements in the chorus. The members of the chorus have no interest in this committee and will not be present.

Immediately after the lunch at the Union the Sophomores will leave from the Union in several Buzz Wagons. Miss Janis will probably be able to appear at the Field before the games start.

The Sophomores and freshman teams have been enabled to secure two acres of their own use and the men who are on them are assured of good use in. As customary, the theatre will be decorated with flags and the streamers of the class colors. The freshmen have the balcony seats as in previous years, while the Sophomore orchestra center will give an entirely different style of performance. The seniors and juniors having the orchestra, right and left.

PERSONAL HYGIENE

Lectures Are Completed—Gym Work To Begin At Once

The last of the series of lectures on PERSONAL HYGIENE was given in room 300 last Thursday afternoon by Dr. White. Four weeks ago the talks were begun by Prof. Scroggin. As he was the head of the biological department, his voice was much different than that of the subsequent speakers. His lectures were followed by the last lectures.

On the following Wednesday, Dr. Scroggin of Harvard spoke. Being at the head of the physical department, Dr. White naturally had many interesting and helpful points to bring. The last talk of the series was given by Dr. White, the medical adviser of the Botany Department. The points raised have been the common points of interest to many other men, but Dr. White took up the points of bodily functions and their care. In all, the talks have been well attended.

The object of the lectures has been to introduce the students to a knowledge of the beginning of the freshman physical training in the Gym. This is not to be continued and every first year students are required to take it.

INSTITUTE COMMITTEE HOLDS MEETING

New Institute Committee Elects Officers And Discusses Improvements

The Institute Committee held its sec-
ond meeting this week. This was the first meeting of the newly constituted committee. The members were elected. R. F. Godwin, president of the Institute Committee; R. A. Copeland, president of the Junior class, chairman of the Student Council; H. A. American, vice-president of the Student Council; H. A. American, vice-president of the Student Council; H. A. American, vice-president of the Student Council; H. A. American, vice-president of the Student Council; H. A. American, vice-president of the Student Council; H. A. American, vice-president of the Student Council; H. A. American, vice-president of the Student Council; H. A. American, vice-president of the Student Council.

A ruling was made today that Buzz Wagons may be allowed to take up those fortunate enough to ride in this wagons.

To Have Precedence Over All

Major Briggs has decided to give the Buzz Wagons precedence over all other cars going out, this week.

Improvements

There are a good many improvements to be made to the Buzz Wagons, the best improvement being the provision of a good lamp.

Through the efforts of the alumni, faculty and outside persons interested in the students welfare, a sum has been raised to be used as salary for a gradu-
ate secretary of the Y. M. C. A. Mr. E. C. Wears, the college secretary for Rhode Island and Connecticut, has been fortunate enough to secure Mr. A. J. Mason to fill this position. Mr. Mason is a graduate of Boston 1909, and although attending college, took a prominent part in athletics, being member of the Harvard University and on track teams. Mr. Mason has also been working during the summer and up to the present week on the Boston 1909 movement.

The work under his management is going to be pushed much more than heretofore. Beginning next Sunday, a list of prominent sportsmen is to be secured. Plans are also under foot to have at least one of the prominent sportsmen provided by upper in the Union and followed by discussion classes.

The Institute, Mr. Mason will not only meet the support of students but will accept the coming meetings and classes, but also the active work in helping secure and putting through undertakings of Y. M. C. A. We can do something if we make up our minds to do it.

For The Field In Buzz Wagons

On Field Day the class of 1909 will hold its first reunion. Before going out to the Union for lunch there will be a meeting of the senior class, between the freshmen and sophomores classes, 1909 will meet for lunch at 12:30 in the Union dining room. They will then leave in a body for Tech Field about 1:50.

There are about fifty 1909 fellows at the Institute and a good sized gathering is expected. Mr. Stotz has arranged to have spec- tacular Field Day lunch served, and music will be furnished by an orchestra.

CALENDAR

Thursday, November 4.
10:00 P. M.—1912 Class Meeting in the Tech Club.
4:15 P. M.—Banjo Club Recital in the Tech Club.
