FIELD DAY DINNER

A BIG SUCCESS

Pres. Macalurin Approves Of
Athletics--Hopes For A Crew

Seventy-three men enjoyed the
dinner Saturday evening given to the
participants of Field Day, which commenced
promptly at seven o'clock. Between the
third and fourth courses Mayor Briggs,
who acted as chairman, announced
that according to custom the Field Day cup
would be passed from man to man until
each before sipping should tell who he
was and from where he came. The cup
was then started. President Macalurin
was the first to drink. After this the
cup would be passed from man to man,
and, according to custom the Field Day
cup was the first to drink. After this the
cup would be passed from man to man,
and, according to custom the Field Day
cup was presented to the captain of the
third and fourth courses Major Briggs,
who, receiving it, gave a short speech on the
necessity of administering the pigskin to
the captain of the underclassmen. The
awards will be run on different lines from
that of other typevs of engines and
they require less lubrication and at-
least the same amount of noise and
is exceedingly interesting, illumina-
ting the expansion force of steam.
The first successful internal combina-
American Rotary engine is also on exhibit.
The principle of operation is identical,
except, of course, that the rotor is free-
from all blow holes, and the only
power the compression in the rotor is
not, however, with illuminating gas from
the street mains is used. This engine
is a very efficient, however, with
steam. There are the benefits right at
hand, and in the personal contact with those
in the advertising, circulation, and news-
department, and in the sales and
promotion art work. Pick out the line
that is not just the one that is not
the news and get it to work right now.
Those should be good for the
better. Three which should guide us in
the matter of these mysterious manifestations,
