Visits Lynn Grade Crossings On Saturday Afternoon

On Saturday, Nov. 13, the Civil Engineering Society went to Lynn on its first excursion for the season. While there the members visited the grade crossings which are about to be abolished. The trip was especially interesting because Prof. Breed, who accompanied the men in a consulting engineer for the city and represents it in the changes which are being made. No definite plans have yet been made for other trips, but several places are being considered.
