Progress in Local Wireless Station

Difficulties Overcome—Interest in New Project Grows Daily

That the Institute will soon have a practical, up-to-date wireless station, capable of receiving messages over a distance of 1000 or 2000 miles under ordinary conditions, is an established fact. The apparatus will be constructed and owned by the Board of Trustees and operated by the Radio Section of the Institute.

Differences and problems have been met, and difficulties overcome. The first evidences of the growth of the Institute, in the form of apparatus, are now to be seen in the new building.

Another point of difficulty has been that of finding a convenient location for the apparatus. This matter has now been practically settled in a manner satisfactory to both parties.

One week from tomorrow the Tech cross-country team will be the last of the cross-country teams representing nearly all the major colleges of the country. Although we have a strong interest in the question of the future of this sport in the country and the last hoped for is that it will be discontinued.

The course is a pretty stiff one six miles in length. The start is made at the field, and the men line up across the far side of the field. At the sound of the gun, the men run towards the start line.

One of the best of the field is the use of a large field. The use of a large field will allow the runners to have the best chance possible to show off their skills.

Catholic Meeting

Instructional Talk on Spiritism Given by Father Scanlan

At the last meeting of the Catholic Club held at the University, about 50 men were present and it was understood that the meeting would be an instructive one.

The meeting was held on the campus, and the audience was made up of about 50 men. The meeting was held in the. Catholic Club.

The view of the ultimate result of a person deluding in this practice, church has taken the stand that these mysterious happenings are all in the nature of spiritualism.

In closing he strongly advised all his students to avoid this dangerous practice. The meeting adjourned at 9:45.

Calendar

Friday, November 12
4:00 A. M.—Meeting of Directors of Wireless Society in Union.
9:00 P. M.—Friday Night Entertainments—Haverford.

Saturday, November 13
1:30 P. M.—Interclass Meet—Haverford and Haverford
2:10 P. M.—Walk over Haverford and Haverford Course.
6:15 P. M.—M. C. A. meeting in Union.

Aeroscope to be Organized Tomorrow

Object—To Experiment in Practical Aviation—Field Will Be Hired

In connection with the Field, a group of students have organized the Aero Club for the purpose of experimenting with the new type of aircraft. The field will be chosen by the students and will be located at the edge of town.

The idea is to form an active society of clubs, the object of which will be to perform practical experiments in aviation. To accomplish this end success will depend upon the students, a reasonable amount of time and thought to the work, and it is expected that in the future this club will make up the club. Undoubtedly, in the face of experimental apparatus, will be comparatively small, and valuable results can be obtained for a minimum expenditure of time and money.

The reason for forming a club lies in the idea that the students will form by themselves an organization as much as possible. This idea will be of great help to the students, and it is expected that in the future this club will make up the club. It will be necessary to use the large field, which is available, and work in the interest of students in the interest of students.

The membership of this club will probably be limited to four or more members, it is to be desired that only those who intend to give active support should plan to join.

Harvard Aero Club

A society for promoting interest in aeronautics, Harvard has been formed, and a committee has been chosen under the chairmanship of a prominent member of the society. The club is known as the Harvard Aeronautical Society, following the formation of similar societies in other colleges.

Two distinct classes of lectures are being given by well-known aeronauts, and the discussions on the members of the committee will be held at 7 p.m. on the last Wednesday of each month, at the Harvard Aero Club.
