### EXCHANGE.

The plans begun some months ago at the University of Notre Dame for the formation of a body of students for the study and practice of aerial navigation are now considered sufficiently matured to be put into practical operation and a permanent organization has been formed. The work done so far has been confined to the building of several engines and the detailed study of the types of flying machines used by the most successful aviators. The biplane has been given the most attention and the machines now in the process of construction are of this type.
