N. Y. STATE CLUB

This evening the New York State Club of the Moss Institute of Technology held its first dinner of this term. This affair will take place at the Techmen's Club, 51 West 6th St.

All men who are residents of New York State, or are students, are eligible for membership. Students are requested to present proof of membership.

History of the New York State Club: The first meeting of the club was held on April 28 last, at the New York State Institute.

The club has a roll of over 100 names, and there have been a few losses by graduation, but not many.

There was a very kind offer from President B. A. D. Finch of the New York members of the entering class, and the club will be well represented.
