## CURRENT EVENTS

Everett C. Brown of Chicago was elected president of the Amateur Athletic Union at the annual meeting succeeding James E. Sullivan, who had held the office for three years. Mr. Sullivan, who has been secretary in previous years, was chosen secretary-treasurer. He was not a candidate for reelection to the presidency.

Among the many routine matters passed upon at the meeting was the adoption of a new rule designed to protect young athletes from overstrain. This regulation athletes under 18 years of age are barred from competing in races exceeding five miles.

Total receipts for the year were \$8580. Cross-country and gymnastic championships alone showed a deficit.

President Sullivan in his annual address discussed various proposed changes in the A. A. U. constitution and rules. Regarding the hammer throw, accidents in connection with which have been somewhat numerous, President Sullivan expressed himself in favor of retaining the event on the A. A. U. list, but thought that some changes to make the competition safer would be advisable.

With his departure on the steamer Lusitania for Liverpool today the visit of Sir Thomas Lipton to this country is said to have practically assured an international yacht race for the America's Cup in 1911.

Although no definite understanding in regard to changing the rules governing the cup races, which Sir Thomas has been anxious to obtain, or the promise of a formal challenge, have been announced, it is said today that Sir Thomas's negotiations with his friends in the New York Yacht Club have paved the way for a forthcoming challenge from the Irish yachtsman.

Germany is fast becoming snow bound by a great snow storm that is sweeping over the whole country today. Nearly all the telegraph and telephone wires were down this afternoon. It is impossible to get domestic messages through.

## THE "DOPESTER"

I see that the cross-country management has started advertising the cross-country intercollegiate, by bill-board posters on the different elevated stations.

All the Yale regulars are on the sick list, as usual, but they will recover speedily on Saturday morning from their almost fatal injuries.

The Boston Journal's school boy cross-country, which is to be held Nov. 26 from Tech field, looks as if it should be interesting. Some of the best runners of the different High Schools are getting into shape.

Did you get your tickets for the game Saturday.

## AM. SCIENCE ASSOC.

From Dec. 27 to Jan. 1 inclusive Boston will be the scene of the annual convocation of the American Association for the Advancement of Science, and some thirty odd scientific associations connected with it. Among these may be mentioned the American Mathematical Society, the American Physical Society, the American Chemical Society, the Geological Society of America and the American Society of Naturalists. The various buildings of the Institute will be the main headquarters and meeting places for societies in mathematics, physics, chemistry, engineering, economics, anthropology and education.

At the opening session, which will be held in Huntington Hall, Monday morning, Dec. 27, addresses of welcome will be given by President Lowell of Harvard College and President MacLaurin of the Institute. Prof. Tyler is chairman and Mr. G. W. Swett of the Mechanical Engineering department is secretary of the arrangement committee of five who are in charge of the plans for that part of the affair connected with the Institute.

Another group of societies, including the sciences of biology, medicine, etc., are to have their headquarters at the Harvard Medical School.

The last meeting at Boston of the American Association was in 1898.

## SOUTHERN CLUB MEETS

### Reception To New Men--Dean Prof. Dewey Speak

Yesterday was notably principally for the number of meetings of different clubs, societies and organizations connected with the Institute. By no means the least important of these was the meeting of the Southern Club of the Massachusetts Institute of Technology.

The Southern Club met last night in the rooms of the Technology Club on Newbury St. at eight o'clock. The meeting was well attended, about forty men being present.

The object of the meeting was to get the new Southern men into the club, and a reception was given to them.

Dean Burton spoke in his usual entertaining manner on his experiences in the South, and Prof. Dewey gave some good advice to the men on intermingling between classes and getting acquainted.

## It won't leak

**MOORE'S NON-LEAKABLE FOUNTAIN PEN**

THE PEN THAT can be carried in any position in your pocket or bag. Upside down or lying flat it can't leak. It is extremely simple in construction, and never gets out of order. When not in use the pen point remains in ink, is always moist, and does not require shaking to start the ink-flow, but writes at once.

There are thousands of satisfied users of Moore's Fountain Pen. Ask any of them what they think of theirs.
