Aero Club Hold Meeting Today
To Decide Important Matters

The Aero Club has been busy en-

gaged preparing plans for a new glider. The actual work will begin on Monday. The engineering committee has decided that all material, plans and money should be handed in on this day. As the first favorable day the club will start a series of experiments with Mr. H. E. Fales' glider. This should create a great deal of interest.

A committee was appointed for the purpose of locating a suitable shed in which an aeroplane may be built. The building of this heavier than air ma-

chine is the most important work of the club. It will be designed and built by the members.

Today there will be a meeting of the club, and it is important that all mem-

bers should be present, as Mr. A. A. Merrill will give an address.
